TikTok D. Bondy Valdovinos Kaye, Jing Zeng, Patrik Wikstrom, 2022-06-16 Since its acquisition and rebranding in 2018, TikTok has become one of the fastest growing platforms in the world. Moreover, it's the first Chinese-developed platform to find mainstream international success, carving its own niche in the global short video industry. In the first comprehensive exploration of TikTok, Kaye, Zeng, and Wikström provide a history of the emergent genre of short video and situate the platform within the cultures and controversies that have accompanied its dramatic growth. They provide an extensive overview of TikTok's functions and uses, the diverse markets in which the platform operates, and the issues of governance that have impacted its expansion. Once thought to be 'just for kids', the authors illustrate how TikTok is further transforming platform cultures and the dynamics of broader creative industries. TikTok, the authors argue, represents an evolutionary step in the way culture is produced and consumed on digital platforms. This timely book is essential reading for students and scholars in media and communication studies and for anyone who has been captivated by the global growth of TikTok and short video.

Houston, We Have a Narrative Randy Olson, 2015-09-16 Ask a scientist about Hollywood, and you'll probably get eye rolls. But ask someone in Hollywood about science, and they'll see dollar signs: moviemakers know that science can be the source of great stories, with all the drama and action that blockbusters require. That's a huge mistake, says Randy Olson: Hollywood has a lot to teach scientists about how to tell a story—and, ultimately, how to do science better. With *Houston, We Have a Narrative*, he lays out a stunningly simple method for turning the dull into the dramatic. Drawing on his unique background, which saw him leave his job as a working scientist to launch a career as a filmmaker, Olson first diagnoses the problem: When scientists tell us about their work, they pile one moment and one detail atop another moment and another detail—a stultifying procession of “and, and, and.” What we need instead is an understanding of the basic elements of story, the narrative structures that our brains are all but hardwired to look for—which Olson boils down, brilliantly, to “And, But, Therefore,” or ABT. At a stroke, the ABT approach introduces momentum (“And”), conflict (“But”), and resolution (“Therefore”)—the fundamental building blocks of story. As Olson has shown by leading countless workshops worldwide, when scientists' eyes are opened to ABT, the effect is staggering: suddenly, they're not just talking about their work—they're telling stories about it. And audiences are captivated. Written with an uncommon verve and enthusiasm, and built on principles that are applicable to fields far beyond science, *Houston, We Have a Narrative* has the power to transform the way science is understood and appreciated, and ultimately how it's done.

Cubism Emily Braun, Rebecca A. Rabinow, 2014-10-09 This beautifully illustrated volume tells the story of Cubism through twenty-two essays that explore the most significant private holding of Cubist art in the world today, the Leonard A. Lauder Collection, now a promised gift to The Metropolitan Museum of Art. The eighty works featured in this volume—by Georges Braque, Juan Gris, Fernand Léger, and Pablo Picasso—are among the most important and visually arresting in the movement's history. These masterpieces, critical to the development of Cubism, include such groundbreaking paintings as Braque's *Trees at L'Estaque*, considered one of the very first Cubist pictures; Picasso's *Still Life with Fan: "L'Indépendant,"* one of the first to introduce typography; Gris's noirish, uncanny *The Man at the Café*, one of his most celebrated collages; and Léger's uniquely ambitious *Composition (The Typographer)*. Written by renowned experts on this subject, the essays trace the evolution of Cubism from its origins in the still lifes, portraits, and collages of Braque and Picasso through the precisely delineated compositions by Gris that prefigure the Synthetic Cubism of the war years to Léger's distinctive intersections of spherical, cylindrical, and cubic forms that evoke the syncopated rhythms of modern life. Also included are a fascinating interview in which Leonard Lauder discusses his approach to collecting, an investigative essay on the information gleaned from the backs of the works themselves, and an authoritative catalogue that further establishes the lives of these magnificent objects. A publication to place alongside the great histories of Modernism, this comprehensive book will stand as the resource for understanding Cubism for many years to come. -
