Sociology in South Africa R. Sooryamoorthy,2016-08-13 This book is the first comprehensive account of the history and current state of South African sociology. Providing a holistic picture of the subject both as it is taught in universities and as a field of research, it reveals the trajectories of a discipline in a challenging socio-political context. With the support of historical and scientometric data, it demonstrates how the changing political situation, from colonialism to apartheid to democracy, has influenced the nature, direction and foci of sociological research in the country. The author shows how, during the apartheid era, sociology was professionally fragmented and divided along language and race lines. It was, however, able to flourish with the advent of democracy in 1994 and has become a unique academic movement. This insightful work will appeal to students and scholars of the social sciences, and all those interested in the history and society of South Africa.

A Passion for success Sivalingum Moodly,2022-01-01 this book, titled "A Passion For Success", demonstrates forcefully how the identified individuals, despite their blindness, surmounted challenges in their own lives in order to achieve success, and, in doing so, invariably improved the quality of lives of others. Consisting of fourteen chapters, each containing a unique story with a compelling theme, the underlying message in the book appears to resonate with the view of Booker T Washington (1856-1915), a leading African American intellectual of the 19 century, who observes that "Success is to be measured not so much by the position one has reached in life, as by the obstacles one has overcome while trying to succeed."

Emerging Economies and Challenges to Sustainability Arve Hansen,Ulrikke Wethal,2014-10-10 The rise of emerging economies represents a challenge to traditional global power balances and raises the question of how we can combine sustainability with continued economic growth. Understanding this global shift and its impact on the environment is the paramount contemporary challenge for development-oriented researchers and policy makers alike. This book breaks new ground by combining scholarship on the role of emerging economies with research on sustainable development. The book investigates how the development strategies of emerging economies challenge traditional development theory and sustainability discourses. With regional introductions and original case studies from South Asia, East Asia, Latin America and Sub-Saharan Africa, it discusses how to conceptualise sustainable development in the global race for economic prosperity. What characterises the development strategies of emerging economies, and what challenges are these posing for global

sustainable development? How can emerging economies shed light on the global challenges, dilemmas and paradoxes of the relationship between socio-economic improvements and environmental degradation? This book will be a valuable resource for researchers and postgraduates in development studies, geography, economics and environmental studies.

The Politics of Slums in the Global South Véronique Dupont,David Jordhus-Lier,Catherine Sutherland,Einar Braathen,2015-08-27 Seeing urban politics from the perspective of those who reside in slums offers an important dimension to the study of urbanism in the global South. Many people living in sub-standard conditions do not have their rights as urban citizens recognised and realise that they cannot rely on formal democratic channels or governance structures. Through in-depth case studies and comparative research, The Politics of Slums in the Global South: Urban Informality in Brazil, India, South Africa and Peru integrates conceptual discussions on urban political dynamics with empirical material from research undertaken in Rio de Janeiro, Delhi, Chennai, Cape Town, Durban and Lima. The chapters engage with the relevant literature and present empirical material on urban governance and cities in the South, housing policy for the urban poor, the politics of knowledge and social mobilisation. Recent theories on urban informality and subaltern urbanism are explored, and the issue of popular participation in public interventions is critically assessed. The book is aimed at a scholarly readership of postgraduate students and researchers in development studies, urban geography, political science, urban sociology and political geography. It is also of great value to urban decision-makers and practitioners.

Intelligent Systems and Applications Kohei Arai,Supriya Kapoor,Rahul Bhatia,2020-08-25 The book Intelligent Systems and Applications - Proceedings of the 2020 Intelligent Systems Conference is a remarkable collection of chapters covering a wider range of topics in areas of intelligent systems and artificial intelligence and their applications to the real world. The Conference attracted a total of 545 submissions from many academic pioneering researchers, scientists, industrial engineers, students from all around the world. These submissions underwent a double-blind peer review process. Of those 545 submissions, 177 submissions have been selected to be included in these proceedings. As intelligent systems continue to replace and sometimes outperform human intelligence in decision-making processes, they have enabled a larger number of problems to be tackled more effectively.This branching out of computational intelligence in several directions and use of intelligent systems in everyday applications have created the need for such an international conference which serves as a venue to report on up-to-the-minute innovations and developments. This book collects both theory and application based chapters on all aspects of artificial intelligence, from classical to intelligent scope. We hope that readers find the volume interesting and valuable; it provides the state of the art intelligent methods and techniques for solving real world problems along with a vision of the future research.

Perspectives on ICT4D and Socio-Economic Growth Opportunities in Developing Countries Ndayizigamiye, Patrick,Barlow-Jones, Glenda,Brink, Roelien,Bvuma, Stella,Minty, Rehana,Mhlongo, Siyabonga,2020-10-09 Technology has

been hailed as one of the catalysts toward economic and human development. In the current economic era of the Fourth Industrial Revolution, information acquisition, transformation, and dissemination processes are posed to be the key enablers of development. However, in the context of developing countries, there is a need for more evidence on the impact that ICT has on addressing developmental issues. Such evidence is needed to make a case for investments in ICT-led interventions to improve people's lives in developing countries. Perspectives on ICT4D and Socio-Economic Growth Opportunities in Developing Countries is a collection of innovative research on current trends that portray the ICT and development nexus (ICT4D) from economic and human development perspectives within developing countries. While highlighting topics including mobile money, poverty alleviation, and consumer behavior, this book is ideally designed for economists, government officials, policymakers, ICT specialists, business professionals, researchers, academicians, students, and entrepreneurs.

Protest in South Africa Heidi Brooks,Rekgotsofetse Chikane,2024-01-23 Popular protest has become a regular feature of post-1994 South Africa. As a young democracy born out of resistance, we may understand the contemporary manifestations of protest as extensions of this broader history. However, it is notably in the context of formal democratic institutions that popular protest has become an increasingly normalised mode of influencing policy, demanding service delivery and forcing change. Protest is constitutive of South Africa's democratic politics, but also reflective of it. Protest in South Africa: Rejection, reassertion, reclamation explores the underpinnings of contemporary protest and both its short-term causes and structural drivers. Focusing on the surge of protest from the mid-2000s, this edited volume provides an overview of the complexity of protest action, the diversity of protest spaces and actors, and responses to protest from both citizens and state. The volume situates its analysis against the backdrop of the global wave of protest witnessed since the turn of the 21 century, while examining protest in South Africa's local and historical contexts. Contributors to the volume examine protests in relation to, among other factors, provision of infrastructure and services, contestations around socio-economic development, issues of citizenship, and demands for inclusive democratic governance. Chapters also examine the role of women in protest action, the policing of protest, and the intersection of protest action with spaces of formal politics. The volume also alerts us to the darker side of protest, and the destruction and division it may foment. It thus considers the prospects of South Africa's evolving, sometimes violent, protest terrain for social and state stability and democratic progress. In the diversity of spaces, sectors and communities of interests in which collective action has emerged, Protest in South Africa: Rejection, reassertion, reclamation shows how protest is underpinned by a rejection of the status quo, a reassertion of interests, and a reclaiming of the political and democratic space.

Geographies of Urban Governance Joyeeta Gupta,Karin Pfeffer,Hebe Verrest,Mirjam Ros-Tonen,2015-08-08 With a current population inflow into cities of 200,000 people per day, UN Habitat expects that up to 75% of the global population

will live in cities by 2050. Influenced by forces of globalization and global change, cities and urban life are transforming rapidly, impacting human welfare, economic development and urban-regional landscapes. This poses new challenges to urban governance, while emerging city networks, advancing geo-technologies and increasing production of continuous data streams require governance actors to re-think and re-work conventional work processes and practices. This book has been written to enhance our understanding of how governance can contribute to the development of just and resilient cities in a context of rapid urban transformations. It examines current governance patterns from a geographical and inclusive development perspective, emphasizing the importance of place, space, scale and human-environment interactions, and paying attention to contemporary processes of participation, networking, and spatialized digitization. The challenge we are facing is to turn future cities into inclusive cities that are diverse but just and within their ecological limits. We believe that the state-of-the-art overview of topical discussions on governance theories, instruments, methods and practices presented in this book provides a basis for understanding and analyzing these challenges.

Breaking a Rainbow, Building a Nation Rekgotsofetse Chikane,2018-10-01 Breaking a Rainbow, Building a Nation is a first-hand account of the university protests that gripped South Africa between 2015 and 2017, widely better known as the #FeesMustFall. Chikane outlines the nature of student politics in the country before, during and after the emergence of #MustFall politics, exploring the political dynamics that informed and drove the student protests, and the effect that these #MustFall movements have had on the nature of youth politics in the country. Chikane looks at how the current nature of youth politics is different from previous youth upheavals that have defined South Africa, specifically due to the fact that the protests were being led by so-called coconuts, who are part of the black elite. Breaking a Rainbow, Building a Nation poses the provocative question, can coconuts be trusted with the revolution?

New Trends in Neutrosophic Theory and Applications Florentin Smarandache (editor),Surapati Pramanik (editor),2016-11-05 Neutrosophic theory and applications have been expanding in all directions at an astonishing rate especially after the introduction the journal entitled "Neutrosophic Sets and Systems". New theories, techniques, algorithms have been rapidly developed. One of the most striking trends in the neutrosophic theory is the hybridization of neutrosophic set with other potential sets such as rough set, bipolar set, soft set, hesitant fuzzy set, etc. The different hybrid structure such as rough neutrosophic set, single valued neutrosophic rough set, bipolar neutrosophic set, single valued neutrosophic hesitant fuzzy set, etc. are proposed in the literature in a short period of time. Neutrosophic set has been a very important tool in all various areas of data mining, decision making, e-learning, engineering, medicine, social science, and some more. The book "New Trends in Neutrosophic Theories and Applications" focuses on theories, methods, algorithms for decision making and also applications involving neutrosophic information. Some topics deal with data mining, decision making, e-learning, graph theory, medical diagnosis, probability theory, topology, and some more. 30 papers by 39 authors and

coauthors.

History beyond apartheid Thula Simpson,2023-04-18 This edited volume encompasses a range of themes and approaches relevant to the field of South African history today, as viewed from the perspective of practicing historians at the cutting edge of research in the discipline. The collection features the historians offering critical reflection on the theoretical and methodological aspects of their work. This involves them both looking back at the inherited historiographical tradition in the respective areas of their research, while also pointing forwards to possible future directions for scholarly engagement.

Political Integration in Indian Diaspora Societies Ruben Gowricharn,2020-09-17 This book studies the political integration of Indian diaspora communities into their host societies. It argues that insertion occurs on an ethnic basis which enables these groups to utilise their clout, and at the same time exert collective rights in matters like freedom of religion, organisation and lifestyle. Drawing on case studies from South Africa, America, and the Caribbean, the volume analyses different forms, levels and patterns of groupist political integration. It examines various instances of integration such as anti-Indian apartheid laws; the life and times of Dr Sudhindra Bose, one of the early Bengali intellectuals in the US; Hindutva organisations in the US/UK; as well as the introduction of the Overseas Citizen of India (OCI) Scheme by the Indian government. An important intervention in the study of ethnic groups and their integration, the book will be of interest to students and researchers of diaspora studies, globalization and transnational migration, cultural studies, minority studies, sociology, political studies, international relations, and South Asian studies.

Cadastre: Principles and Practice Roger Fisher & Jennifer Whittal,2020-02-25 Keywords: history, surveying, land tenure, land rights, cadastre, cadastral, professionalism, law, land administration, land policy, land boundaries, river, bank, high water mark, high-water mark, estuary, ICMA, mineral rights, international law, maritime zone, marine spatial planning, diagram, general plan, lease, sectional title, case law Explaining the principles of cadastral law and interpretation in practice, this is the first publication of its kind in over 45 years. It as a comprehensive text for aspiring and practicing professional land surveyors, those in the real property business, and those involved in land administration. Written for the South African practice environment, it will also be of interest to an international audience. The authors' approach is progressive with the intent to inspire development to meet the needs of our society for secure land tenure for all. A broad range of topics are included: historical roots of tenure in the ancient world, the early development of the cadastre in South Africa, and development of the land surveying profession and professionalism. This provides context to the discussion on land law, tenure and rights; on legal institutions, on land administration, as well as government policies and reform imperatives. Defining property boundaries of rights in space is a particular challenge of the cadastral land surveyor. The chapters on the definition of beacons and boundaries cover a broad range of onshore and offshore application environments. They span the extent of ownership and limited real rights within the sovereign area of the Republic of South Africa. These environments

include the air, the land surface and subterrestrial; coastal waters, and the sea bed. Particular attention is paid to complex river and coastal property boundaries. Case law is a key driver for changes in legislation and is also highly directive in terms of practice. The final chapter of the book is dedicated to a themed exploration of case law relating to beacons, boundaries, evidence, rights and restrictions. Cadastre: Principles and Practice will be an important addition to your professional bookshelf. Order it here: https://www.sagi.co.za/product/cadastre-principles-and-practice/

Generation, Gender and Negotiating Custom in South Africa Elena Moore,2022-06-16 This book investigates how customary practices in South Africa have led to negotiation and contestation over human rights, gender and generational power. Drawing on a range of original empirical studies, this book provides important new insights into the realities of regulating personal relationships in complex social fields in which customary practices are negotiated. This book not only adds to a fuller understanding of how customary practices are experienced in contemporary South Africa, but it also contributes to a large discussion about the experiences, impact and ongoing negotiations around changing structures of gender and generational power and rights in contemporary South Africa. It will be of interest to researchers across the fields of sociology, family/customary law, gender, social policy and African Studies.

Knowledge and Knowers Karl Maton,2013-09-11 We live in 'knowledge societies' and work in 'knowledge economies', but accounts of social change treat knowledge as homogeneous and neutral. While knowledge should be central to educational research, it focuses on processes of knowing and condemns studies of knowledge as essentialist. This book unfolds a sophisticated theoretical framework for analysing knowledge practices: Legitimation Code Theory or 'LCT'. By extending and integrating the influential approaches of Pierre Bourdieu and Basil Bernstein, LCT offers a practical means for overcoming knowledge-blindness without succumbing to essentialism or relativism. Through detailed studies of pressing issues in education, the book sets out the multi-dimensional conceptual toolkit of LCT and shows how it can be used in research. Chapters introduce concepts by exploring topics across the disciplinary and institutional maps of education: -how to enable cumulative learning at school and university -the unfounded popularity of 'student-centred learning' and constructivism -the rise and demise of British cultural studies in higher education -the positive role of canons -proclaimed 'revolutions' in social science -the 'two cultures' debate between science and humanities -how to build cumulative knowledge in research -the unpopularity of school Music -how current debates in economics and physics are creating major schisms in those fields. LCT is a rapidly growing approach to the study of education, knowledge and practice, and this landmark book is the first to systematically set out key aspects of this theory. It offers an explanatory framework for empirical research, applicable to a wide range of practices and social fields, and will be essential reading for all serious students and scholars of education and sociology.

Google Earth Engine Applications Lalit Kumar,Onisimo Mutanga,2019-04-23 In a rapidly changing world, there is an

ever-increasing need to monitor the Earth's resources and manage it sustainably for future generations. Earth observation from satellites is critical to provide information required for informed and timely decision making in this regard. Satellite-based earth observation has advanced rapidly over the last 50 years, and there is a plethora of satellite sensors imaging the Earth at finer spatial and spectral resolutions as well as high temporal resolutions. The amount of data available for any single location on the Earth is now at the petabyte-scale. An ever-increasing capacity and computing power is needed to handle such large datasets. The Google Earth Engine (GEE) is a cloud-based computing platform that was established by Google to support such data processing. This facility allows for the storage, processing and analysis of spatial data using centralized high-power computing resources, allowing scientists, researchers, hobbyists and anyone else interested in such fields to mine this data and understand the changes occurring on the Earth's surface. This book presents research that applies the Google Earth Engine in mining, storing, retrieving and processing spatial data for a variety of applications that include vegetation monitoring, cropland mapping, ecosystem assessment, and gross primary productivity, among others. Datasets used range from coarse spatial resolution data, such as MODIS, to medium resolution datasets (Worldview -2), and the studies cover the entire globe at varying spatial and temporal scales.

Indigenous Language for Social Change Communication in the Global South Abiodun Salawu,Tshepang Bright Molale,Enrique Uribe-Jongbloed,Mohammad Sahid Ullah,2023-05-22 Indigenous Language for Social Change Communication in the Global South brings together voices from the margins to engage in dialogue about common social change issues in Latin America, Africa, and Asia. This book argues that resistance and social movements, expressed in music and songs and exchanged via radio, remain fundamental to ensure that the linguistic and cultural diversity of the world progresses despite colonizing pressures. Contributors present cases that explore how indigenous communities use mediums such as the radio to help support their language, identity, and expand their own social change. Highlighting the centrality of music in the development of political discussions and language as a central part of collective identity, contributors analyze how these mediums function as both a vessel and a link for information and cultural cohesion of those engaging in social change. Scholars of communication, sociology, and development studies will find this book of particular interest.

A History of the Present Ashwin Desai,Goolam Vahed,2019-09-12 Through the long 20th century, Indian South Africans lived under the whip of settler colonialism and white minority rule, which saw the passing of a slew of legislation that circumscribed their freedom of movement, threatened repatriation, and denied them citizenship, all the while herding them into racially segregated townships. This volume chronicles the broad outlines of this history. Taking the story into the present, it provides an analysis of how Indian South Africans have responded to changes wrought by the remarkable collapse of apartheid and the holding of the first democratic elections in 1994. Drawing upon archival records, in-depth interviews, and ethnography, this study examines the ways in which Indian South Africans define themselves and the world around them,

and how they are defined by others. It tells of the incredible journey of Indian South Africans, many of whom are fourth and fifth generation, towards being recognized as citizens in the land of their birth and how, while often attracted by and seeking to explore their roots in India, they continue to dig deeper roots in African soil.

On the Critique of Identity Ivo Ritzer,2025-01-07 With the rise of 'identity politics' both in right-wing extremism as well as in activist academia, arts and feuilleton, major differences between the traditional left and the right have become blurred. This book addresses the ideological shifts from a vantage point of critical theory, psychoanalysis, as well as Marxist interventions. Discussed are prevailing ideologies of identitarianism, putting the latter into social and historical, as well as philosophical and epistemological context. The chapters offer theoretical elaborations on the myriad connections of identitarianism and counter-enlightenment, analyzing in particular the role of ethnocentric populism, antisemitism, as well as conformist and conservative rebellion.

Introduction to Gender Studies in Eastern and Southern Africa James Etim,2016-07-28 Africa has witnessed massive changes in the last fifty years – from independence through structural adjustment, rule by military juntas in several countries and to a period now where the focus is on how best to prioritize their needs based on resources, national goals and human potential. There is general agreement that human capital is important in economic growth and development. There is always the need to ensure that resources and human capital are used appropriately to advance development. Gender disparities, whether in treatment, access to resources, resource utilization and the law, may in themselves retard or slow down development. Resources and human potential in all societies include how best to ensure there is no gender disparity and to fully tap the resources inherent in women for personal, social and national development. Beginning with the women's suffrage movement, there has been the push to encourage gender equality worldwide. The Fourth World Conference on Women in Beijing in 1995 embodies the commitment of the international community to implement policies that will enhance the political, social, economic, educational empowerment of women. This book highlights the issues affecting women in Eastern and Southern Africa – what role does custom and patriarchy play in gender disparities in education, access to health, problems in the workplace and family relationships? How have women writers in the last twenty years presented the issues of patriarchy, women's rights, globalism and women's holistic development? What are recent developments that have helped improve the situation for some women? These are some of the issues that are covered in this book. The thesis of this book is that there have been policies and strategies developed that have worked to empower women. However, vestiges of sexism, gender disparities in several fields still remain and traditions/customs and patriarchy have aided in still keeping women down.div"/div>
