Use of Laboratory Animals in Biomedical and Behavioral Research National Research Council,Institute of Medicine,Institute for Laboratory Animal Research,Commission on Life Sciences,Committee on the Use of Laboratory Animals in Biomedical and Behavioral Research,1988-02-01 Scientific experiments using animals have contributed significantly to the improvement of human health. Animal experiments were crucial to the conquest of polio, for example, and they will undoubtedly be one of the keystones in AIDS research. However, some persons believe that the cost to the animals is often high. Authored by a committee of experts from various fields, this book discusses the benefits that have resulted from animal research, the scope of animal research today, the concerns of advocates of animal welfare, and the prospects for finding alternatives to animal use. The authors conclude with specific recommendations for more consistent government action.

Animals That Live in Social Groups Bobbie Kalman,2016-04-16 One of the biggest adaptations made by some animals is to live and work together as a group to ensure their survival. This intriguing book shows how social animals communicate and interact with members of their own species. Elephants, dolphins and orcas, monkeys, apes, lions, and wolves, educate their young, work together to find food, and take care of their group members. Smaller animals that work together in microsocieties include termites, ants, bees, and wasps. Students will have fun comparing their own social groups to those found in nature. Fascinating photographs accompany thought-provoking questions and activities.

A Sense of Belonging Jennifer Allen,2023-10-10 Too often, new teachers enter the profession excited to make a difference in the lives of children only to find themselves disillusioned and overwhelmed with the expectations of the classroom. In *A Sense of Belonging*, Jennifer Allen shares her stories and journey in creating an infrastructure of support for new teachers within her school district. *A Sense of Belonging* provides research-based, practical ideas on how to support new teachers while honoring the innovation, idealism, and optimistic enthusiasm that they bring to the classroom. From supporting new teachers early in the year with administering and analyzing literacy assessments, through using student work to guide instruction, to offering ongoing help with curriculum planning, Jennifer shares strategies on: fostering relationships with new teachers, starting before school even begins; creating learning environments for new teachers to be reflective practitioners; coaching new teachers in their classrooms and providing opportunities for them to observe their peers in action; supporting new teachers beyond their first year through gradual release of support over their first several years in the classroom; and, facilitating professional development opportunities where new and veteran teachers learn alongside one another. Jennifer believes, and her book demonstrates, that when schools embrace, encourage, and celebrate the work of

new teachers, they establish a supportive environment that fosters excellence and improves retention.

Children, Dogs and Education Mary Renck Jalongo, 2018-05-08 This book brings together authoritative information about the child/dog bond as it is manifested with family dogs, visiting therapy dogs, and service dogs trained to assist children with disabilities. Despite the widely accepted view that participating in a dog's care and interacting with dogs in behaviorally healthy ways is a route to becoming responsible and compassionate, research on this complex dynamic is difficult to design, time-consuming to collect, and challenging to analyze. This volume synthesizes theory, research, and practice, bringing all to bear upon child/dog interactions in homes, schools, libraries, and the community at large. *Children, Dogs and Education* serves as a handbook for a diverse group of adults who seek to build positive relationships between children and dogs—parents/families, professional dog trainers, teachers, librarians, mental health professionals, health care professionals, and university faculty. The study of interactions between human and nonhuman animals has captured the imagination of an international community of researchers from many different fields and professions. Even though dogs are ubiquitous in the lives of most children, studies of children's interactions with dogs in families and communities are lacking. Most of the previous research on the human-canine bond has focused on adolescents and adults or, even when younger children are the focus, it has tended to rely on parents to speak for children. There are three features of this book that make it unique. First, it goes beyond exploring the child/dog bond to examine additional important issues, including: children's concepts of responsible care, their ability to interpret dogs' behavioral cues, and their ideas about canine behavioral issues/training. Second, unlike most other work to date, it represents children's voices through cases, interviews, and drawings. Finally, the contributors to this edited work use their collective wisdom to draw educational implications and suggest direction in preparing the next generation of dog guardians.

Inquiry and the Common Core Violet H. Harada, Sharon Coatney, 2013-12-16 Practicing librarians and library educators demonstrate the power of inquiry to achieve the Common Core State Standards (CCSS) and promote school librarians as key partners in implementing this type of critical teaching and learning in K-12 schools. With the adoption of the CCSS in most of the nation's schools, educators and administrators at K-12 schools have a pressing need to find the best ways to implement these rigorous and comprehensive standards that challenge students to understand informational text and digital content at increasing levels of complexity. This text provides faculty with much-needed support in achieving this critical goal, thoroughly describing inquiry learning and how it links to the CCSS. The authors—nearly 30 contributors total, comprising librarians, library media specialists, educational leaders, teachers from the kindergarten level to college professors, and administrators, each with direct experience and knowledge regarding the subject matter—explain how the standards' emphasis on in-depth investigation and evidence-based reading and writing skills dovetail perfectly with inquiry-based learning initiatives. Acclaimed thought leaders such as Jean Donham, Kristin Fontischiaro, Leslie Maniotes, and Barbara Stripling clearly define and illuminate the librarian's role in school initiatives today and share lesson plans that have been proven effective in actual practice.

Teaching Kids to Be Confident, Effective Communicators Phil Schlemmer, Dori Schlemmer, 2011-03-01 Build children's proficiency with oral and written communication, promote social and emotional learning (SEL), and help students work toward standards while developing critical skills they'll need in later grades. This practical and unique resource presents 18 classroom-tested projects, called "openings," in core curricular areas. Students research topics and present what they have learned to their peers with this kids-teaching-kids approach to differentiated, project-based learning. Projects align with content standards in core curricular areas. Digital content includes the book's reproducible forms (customizable and printable) and three bonus openings.
