Curriculum 21 Heidi Hayes Jacobs, 2010-01-05 What year are you preparing your students for? 1973? 1995? Can you honestly say that your school's curriculum and the program you use are preparing your students for 2015 or 2020? Are you even preparing them for today? With those provocative questions, author and educator Heidi Hayes Jacobs launches a powerful case for overhauling, updating, and injecting life into the K-12 curriculum. Sharing her expertise as a world-renowned curriculum designer and calling upon the collective wisdom of 10 education thought leaders, Jacobs provides insight and inspiration in the following key areas: * Content and assessment: How to identify what to keep, what to cut, and what to create, and where portfolios and other new kinds of assessment fit into the picture. * Program structures: How to improve our use of time and space and groupings of students and staff. * Technology: How it's transforming teaching, and

how to take advantage of students' natural facility with technology. * Media literacy: The essential issues to address, and the best resources for helping students become informed users of multiple forms of media. * Globalization: What steps to take to help students gain a global perspective. * Sustainability: How to instill enduring values and beliefs that will lead to healthier local, national, and global communities. * Habits of mind: The thinking habits that students, teachers, and administrators need to develop and practice to succeed in school, work, and life. The answers to these questions and many more make Curriculum 21 the ideal guide for transforming our schools into what they must become: learning organizations that match the times in which we live.

EcoKids Dan Chiras,2005-06-01 To forge a sustainable future, we need citizens who care for the Earth. We need citizens who understand that planet care is the ultimate form of self-care. But we also need generations who live according to their values and convictions and who can effect positive change in their lives and the lives of others. Because public schools and the popular media cannot be counted on to produce an Earth-friendly citizenry, the task falls to parents. Yet even aware parents often lack the understanding and resources to take on such a task. EcoKids addresses this gap by presenting a coherent plan that will help parents foster love for nature, teach children the importance of environmental protection, and promote environmental values and inspire action - actions that will last a lifetime. A hopeful and inspiring guide for parents, topics covered include ways to: avoid gloom and doom in favor of positive solutions foster love and empathy for nature develop environmental values put values into action help children discover the roots of problems and be part of lasting solutions walk the talk counter the consumer culture, starting in your own home and community generate hope and combat apathy. Each chapter includes an inspiring case study of a child who's making a difference, short pieces that highlight serious problems such as global warming, along with positive solutions that can be read aloud to children, and activities for children. A resource guide lists helpful books, articles, videos, and organizations.

The Busy Family's Guide to Volunteering Jenny Lynn Friedman,2003 Describes a variety of ways that families can get involved in volunteering, despite a busy schedule, and explains the many benefits of volunteering for all ages.

EDUCATION FOR SUSTAINABILITY -Volume I Robert V. Farrell ,George Papagiannis,2009-10-10 Education for Sustainability is a component of Encyclopedia of Human Resources Policy, Development and Management in the global Encyclopedia of Life Support Systems (EOLSS), which is an integrated compendium of twenty one Encyclopedias. The Theme on Education for Sustainability provides the essential aspects and a myriad of issues of great relevance connection between education and more sustainable futures and embraces a reality that all need to know. It demands a much broader interpretation of education--a holistic perspective that accommodates new and challenging ideas. Such education is imperative in creating the knowledge, wisdom and vision needed for the transition to a more sustainable world. In helping to design this sustainable future, education for sustainability implements a vital systemic perspective that will allow for a

complex interdependence of all life forms and Earth. This volume is aimed at the following five major target audiences: University and College Students, Educators, Professional Practitioners, Research Personnel and Policy Analysts, Managers, and Decision Makers and NGOs.

Essentials of Young Adult Literature Carl M. Tomlinson, Carol Lynch-Brown, 2007 *Essentials of Young Adult Literature* Based on a genre approach to literature, this long-awaited book offers a comprehensive, clear, and succinct overview of adolescent literature. It includes recommended books listed by genre and topic, and engages readers by offering a thorough discussion of the major trends and issues affecting young adult literature such as censorship, the literary canon, and accountability. It provides clearly stated positions on the current issues affecting schools and literature. Written by well-known authors Carl Tomlinson and Carol Lynch-Brown, *Essentials of Young Adult Literature* places emphasis on reading a wide variety of young adult literature and addresses all types and formats of literature including novels, short stories, graphic novels, and picture books for older readers. In addition, notable authors are featured in each genre chapter and multicultural and international literature is integrated throughout the book and then treated more fully in its own chapter. Current and future teachers will appreciate the authors' practical strategies for connecting secondary school students with young adult books, such as how to select books that students will read and enjoy, how to motivate resistant readers to read, and how to develop text sets for classroom study across the curriculum. Readers will be equipped with the knowledge to use trade books as excellent teaching and learning materials and will not be limited to using textbooks alone. Key Features Literature Across the Curriculum features found in all genre chapters give examples of how young adult literature can help students and teachers in the content areas learn or present course content in a more interesting, memorable way. Extensive lists of recommended books briefly annotated with topics and age levels follow each genre chapter. One full chapter devoted to addressing the specific needs of resistant readers give middle and high school teachers much-needed strategies for addressing common obstacles to reading and for motivating students to read. Every chapter presents one to three charts with information about milestone books, history of specific genres, and research. Appendices feature Young Adult Book Award lists and YA Magazines, organized by content area and include ordering information. Forsaken Earth: The Ongoing Mass Extinction Paul Sequoia Rauch, 2016-07-28 The Ongoing Mass Extinction of species is the most overriding issue on Earth, transcending and encompassing all others. It's already proven; there's no debate. It is a monumental event occurring right now and escalating, its culmination set to happen within most of our lives. *Forsaken Earth* delves deeply into this matter like no other, that the worst of this earth-shattering extinction event might still

be avoided. Forsaken Earth fully reveals that humans are undeniably causing and allowing this event to happen, and that we are the only ones who can and must stop it. Everything you ever wanted to know about our gorgeous Earth to the history of the cultural ideology at the root of the problem to the effect upon every ecosystem of Earth is written in this one potent volume. Forsaken Earth provides more solutions than any yet offered and leads us to discover and activate our most meaningful purpose, individually and as humanity, to participate and truly support the healing of life on Earth - now.

Teaching and Learning Science Kenneth George Tobin,2006 Teaching and Learning Science consists of 66 chapters written by more than 90 leading educators and scientists. The contributions are informed by cutting-edge theory and research and address numerous issues that are central to K-12 education. The book is arranged according to themes that are central to science education: language and scientific literacy, home and school relationships, equity, new roles for teachers and students, connecting science to other areas of the curriculum, resources for teachers and learners, and science in the news. The authors address controversial topics such as evolution, and present alternative ways to think about teaching, learning, the outcomes of science education, and issues associated with high stakes testing. In addition, relationships between science and literacy are explored in terms of art and science, making sense of visuals in textbooks, reading, writing, children's literature, and uses of comics to represent science.--Publisher's website.
