The Policy and Practice of English Medium of Instruction (EMI) in Pakistani Universities Humaira Irfan, 2019-01-23 This book discusses the perceptions of staff and students with regards to the policy and practice of English as the medium of instruction (EMI) in Pakistani universities. Findings from qualitative and quantitative data collected in two public universities are compared to identify perceptions of problems concerning English as a medium of instruction for postgraduate study. The research also examines participants' attitudes towards the use of Pakistani English (PakE), a distinct variety of English different from other dialects such as American English and British English in its various linguistic features, in higher education settings. The findings explore the gap between the policy and practice of EMI, and expose various multi-layered and inevitable issues.

**The Major Languages of South Asia, the Middle East and Africa** Bernard Comrie, 2003-09-02 Based on the much-praised *The World's Major Languages*, this is the first comprehensive guide in paperback to describe the development, grammar, sound and writing system, and sociological factors of the major language families in these areas.

Information Systems for Indian Languages Chandan Singh, Gurpreet Singh Lehal, Jyotsna Sengupta, Dharam Veer Sharma, Vishal Goyal, 2011-02-11 This book constitutes the refereed proceedings of the International Conference on Information Systems for Indian Languages, ICISIL 2011, held in Patiala, India, in March 2011. The 63 revised papers presented were carefully reviewed and selected from 126 paper submissions (full papers as well as poster papers) and 25 demo submissions. The papers address all current aspects on localization, e-governance, Web content accessibility, search

engine and information retrieval systems, online and offline OCR, handwriting recognition, machine translation and transliteration, and text-to-speech and speech recognition - all with a particular focus on Indic scripts and languages.

Machine Learning Algorithms for Industrial Applications Santosh Kumar Das, Shom Prasad Das, Nilanjan Dey, Aboul-Ella Hassanien, 2020-07-18 This book explores several problems and their solutions regarding data analysis and prediction for industrial applications. Machine learning is a prominent topic in modern industries: its influence can be felt in many aspects of everyday life, as the world rapidly embraces big data and data analytics. Accordingly, there is a pressing need for novel and innovative algorithms to help us find effective solutions in industrial application areas such as media, healthcare, travel, finance, and retail. In all of these areas, data is the crucial parameter, and the main key to unlocking the value of industry. The book presents a range of intelligent algorithms that can be used to filter useful information in the above-mentioned application areas and efficiently solve particular problems. Its main objective is to raise awareness for this important field among students, researchers, and industrial practitioners.

*Pakistan's Wars* Tariq Rahman, 2022-06-09 This book studies the wars Pakistan has fought over the years with India as well as other non-state actors. Focusing on the first Kashmir war (1947-48), the wars of 1965 and 1971, and the 1999 Kargil war, it analyses the elite decision-making, which leads to these conflicts and tries to understand how Pakistan got involved in the first place. The author applies the 'gambling model' to provide insights into the dysfunctional world view, risk-taking behaviour, and other behavioural patterns of the decision makers, which precipitate these wars and highlight their effects on India-Pakistan relations for the future. The book also brings to the fore the experience of widows, children, common soldiers, displaced civilians, and villagers living near borders, in the form of interviews, to understand the subaltern perspective. A nuanced and accessible military history of Pakistan, this book will be indispensable to scholars and researchers of military history, defence and strategic studies, international relations, political studies, war and conflict studies, and South Asian studies.

**The Indo-Aryan Languages** Danesh Jain, George Cardona, 2007-07-26 The Indo-Aryan languages are spoken by at least

700 million people throughout India, Pakistan, Bangladesh, Nepal, Sri Lanka and the Maldives Islands. They have a claim to great antiquity, with the earliest Vedic Sanskrit texts dating to the end of the second millennium B.C. With texts in Old Indo-Aryan, Middle Indo-Aryan and Modern Indo-Aryan, this language family supplies a historical documentation of language change over a longer period than any other subgroup of Indo-European. This volume is divided into two main sections dealing with general matters and individual languages. Each chapter on the individual language covers the phonology and grammar (morphology and syntax) of the language and its writing system, and gives the historical background and information concerning the geography of the language and the number of its speakers.

Kaye, 1997-06-30 This large, 2-volume work presents more than 50 authoritative articles by leading specialists on a wide variety of ancient, medieval, and modern languages and dialects of the greater Near East and Africa, from a variety of language families. The articles are concise descriptive narratives presenting the basics of the phonology of the languages and dialects, with an emphasis on the phonological processes operative in them. A major goal of the work is a definite statement on the language and/or dialect in question with regard to genetics, typology, and/or universal elements. Of interest to general linguists as well as those specializing in Afro-Asiatic languages.
