Commercial and Business Organizations Law in Papua New Guinea John Mugambwa,Harrison Amankwah,C.E.P. (Val) Haynes,2007-08-07 A timely and apposite treatise on Papua New Guinea's economic environment, this book explores business organizations law and various aspects of commercial law in Papua New Guinea in a readable and informative style. Business and commerce is the twin engine that propels the economy of a modern nation. They ensure steady economic growth and development. In an age of globalization, they assume even greater importance than at any other time in human history. A nation risks being marginalized or left behind in the race for a share of the world economic market unless it ensures the stability of its business and commercial sector. Trade regulation, good governance and democratic institutions go hand in hand in guaranteeing political and social equilibrium. As such the laws designed to facilitate trade and commerce are a vital component of the political and social equation. This is a valuable book for law students, legal practitioners, accountants and business executives, not only within Papua New Guinea, but also in Australia and throughout the South Pacific.

Conservation and the Use of Wildlife Resources Melvin Bolton,2012-12-06 Not everybody cares about the fate of wild animals or the state of the natural environment. I met a lady who said it wouldn't worry her if all the wild animals in the

world disappeared overnight. She was a city person~ she said. There are also people who would prefer to let animals become extinct than to have them kept in captivity - no matter how progressive the zoo. There are those who, on principle, will not eat meat, let alone do the killing, and there are those who enjoy nothing so much as shooting birds. People in the last two camps may oppose each other in claiming to be conservationists. Extremists are unlikely to find their opinions being reversed by this book but, because of the scope of the subject, I believe there is a good chance that anybody with an interest in wildlife will find in it something new to think about. It may not be too much to hope that a few disagreements might also be settled because I suspect there is more common ground than is generally realized among those with opposing views.

Marketing in the Third World Denise Martha Johnson, Erdener Kaynak, 1996 Also described for the reader is the unique advertising practice in Papua New Guinea known as workabout, in which a drama troupe travels from village to village and performs live commercials.

Anthropology and Consultancy Pamela Stewart, Andrew J. Strathern, 2004-08-01 More and more, anthropologists are recruited as consultants by government departments, companies or as observers of development processes in their field areas generally. Although these roles can be very gratifying, they can create ambiguous situations for the anthropologists who find that new pressures and responsibilities are placed upon them for which their training did not prepare them. This volume explores some of the problems, opportunities, issues, debates, and dilemmas surrounding these roles. The geographic focus of the studies is Papua New Guinea, but the topic and its importance apply widely through the world, for example, Africa, South America, Australia, and the Pacific in general, as well as in relation to indigenous groups in Canada and elsewhere. All the authors have first-hand experience and they address these new pressures and responsibilities of anthropological research. The book's chapters are written in a way that combines scholarship with a style accessible to general readers.

Information and Communications Technologies in School Mathematics David Tinsley, David B. Johnson, 2013-06-05 The International Federation for Information Processing, IFIP, is a multinational federation of professional technical organisations concerned with information processing. IFIP is dedicated to improving communication and increased understanding among practitioners of all nations about the role information processing can play in all walks of life. This Working Conference, Secondary School Mathematics in the World of Communication Technologies: Learning, Teaching and the Curriculum, was organised by Working Group 3.1, Informatics in Secondary Education, of IFIP Technical Committee for Education, TC3. This is the third conference on this theme organised by WG 3.1, the previous two were held in Varna, Bulgaria, 1977, and Sofia, Bulgaria, 1987-proceedings published by North-Holland Elsevier. The aim of the conference was to take a forward look at the issue of the relationships between mathematics and the new technologies of information and communication in the context of the increased availability of interactive and dynamic information processing tools. The

main focus was on the mathematics education of students in the age range of about 11 to 18 years and the following themes were addressed: • Curriculum: curriculum evolution; relationships with informatics; • Teachers: professional development; methodology and practice; • Learners: tools and techniques; concept development; research and theory; • Human and social issues: culture and policy; personal impact.

Papua New Guinea in the Twenty-First Century David Lea, 2023-04-24 Papua New Guinea is a relatively recent independent state engaged in a struggle to develop economically and exercise a degree of sovereignty. This work articulates the challenges that confront the young nation including, security, economic viability, delivery of services, and control of political corruption. While these are matters internal to the functionality of the nation state, the author argues that matters have changed dramatically with China's growing influence in the region and the ensuing competition between the United States and China. With this increasing geopolitical importance there is the promise of financial benefit, but there are also new challenges as there is the ever-present danger of becoming enmeshed in superpower competition. David Lea argues that lack of economic development and continuing aid dependency may well render island nations such as Papua New Guinea susceptible to political manipulation and further loss of sovereignty, including even a risk of military involvement.

Human- Centric Integration of Next-Generation Data Science and Blockchain Technology Amit Kumar Tyagi, Shrikant Tiwari, 2025-03-17 Human- Centric Integration of Next Generation Data Science and Blockchain Technology: Advancing Society 5.0 Paradigms focuses on the current technological landscape, addressing the evolving integration of data science and blockchain within the context of Society 5.0. This comprehensive resource explains the convergences between data science, blockchain, and the human-centric vision of Society 5.0, while also filling the gap in understanding and navigating this transformative intersection with recent shifts towards more decentralized and data-driven paradigms. The book introduces the concept of Society 5.0, examining the historical context, and outlines the evolving technological landscape shaping our interconnected future. It discusses the fundamental principles of data science, from data collection and preprocessing to exploratory data analysis and explains the transformative impact of data science and blockchain across industries such as healthcare, finance, education, and transportation. This book is essential to understanding and shaping the future of technology and society from decentralized solutions to predictive analytics/ emerging technologies. - Addresses the evolving integration of data science and blockchain within the context of Society 5.0 - Introduces the basic architecture and taxonomy of blockchain technology - Explores the future urban lives under the concept of Society 5.0, characterized by the key phrases of data-driven society and knowledge-intensive society - Offers a firm foundation and understanding of recent advancements in various domains such as data analytics, neural networks, computer vision, and robotics, along with practical solutions to existing problems in fields such as healthcare, manufacturing industries, security, and infrastructure management

New Horizons for Industry 4.0 in Modern Business Anand Nayyar, Mohd Naved, Rudra Rameshwar, 2023-02-09 This book discovers what it will take to reindustrialize the previous industrial powerhouses in order to offset the advantages of cheap labor suppliers dominating the industrial sector by exploring the current situation of the production, processing, and manufacturing industries. The Internet of Things (IoT), Big Data, Cyber-Physical Systems (CPS), and Cloud Computing, Cyber Security, Cobotics, Automation, AI, 3D Printing and Additive Manufacturing, SDN, Blockchain technologies are outlined in this unique and comprehensive book, which has true potential for professionals, researchers, policymakers, and book users. New Horizons for Industry 4.0 in Modern Business encompass trends in business and technology globally that may completely alter how manufacturing and production are conducted. What you will discover: Learn about the Industrial Internet of Things and the Industrial Internet. Learn about the technologies that must develop to support Industry 4.0 and what is being done right now to make that happen. In this book, the topic of Industry 4.0 is covered in detail, and it even moves on to concepts of Digital Twins to boost output and create Industrial Internet of Things. With the development of new digital industrial technology, or Industry 4.0, it is now feasible to collect and analyze data from many machines, resulting in processes that are quicker, more adaptable, and more efficient, producing things of higher quality while spending less money. The manufacturing revolution will boost productivity, alter economics, promote industrial development, and alter workforce demographics, ultimately altering the competitiveness of businesses and areas. Although advanced digital technology is being employed in manufacturing, Industry 4.0 will completely change how things are done. Greater production efficiencies will result, and conventional connections between suppliers, manufacturers, and consumers—as well as between people and machines—will shift. Industry 4.0 is changing the business process. This disruptive technology is radically changing the way businesses/manufacturing is conducted. It will give machines that little bit of intuition with the help of robotics, 3D printing, artificial intelligence, augmented reality, and virtual reality—that will help them do mindless and repetitive jobs without human intervention, allowing humans to focus more on their core competencies.

Japanese Perceptions of Papua New Guinea Ryota Nishino, 2022-09-08 Japanese Perceptions of Papua New Guinea exposes the interactions between two ostensibly opposing worlds: war and travel. While soldiers deployed to Eastern New Guinea during the Second World War recalled first-hand their experience of war, post-war tourists visited battle-sites, met locals, and drew their own conclusions about the Pacific island from the Japanese media. This book, in bringing travel and war closer together through a comparative analysis of veterans' memoirs and the records of postwar travelers, explores how individuals consume, create, and recreate war histories. As a result, Ryota Nishino reveals the extent to which the memory of defeat - for both soldiers and civilians alike - influenced the Japanese perceptions of Papua New Guinea and shaped future relations between the countries. Translating a diverse range of Japanese primary and archival sources, this book provides the first English-language analysis of the social and political impact of Japanese interpretations of the PNG campaign and its aftermath. As such, Japanese Perceptions of Papua New Guinea: War, Travel and the Reimagining of History is an important text for anyone seeking a sophisticated understanding of war, nationalism, and memory culture in Japan and the Pacific Islands.

Pacific Youth Helen Lee, 2019-10-31 Pacific populations are becoming younger and this 'youth bulge' is often perceived as a dangerous precursor to civil unrest. Yet young people are also a valuable resource holding exciting potential for the future of island nations. Addressing these conflicting views of youth, this volume presents ethnographic case studies of young people from across the Pacific and the diaspora. Moving beyond the typical focus on 'youth problems' in reports by Pacific governments and development agencies, the authors examine the highly diverse lives and perspectives of young people in urban and rural locations. They celebrate the contributions of youth to their communities while examining the challenges they face. The case studies explore the impacts of profound local and global changes and cover a wide sweep of youth experiences across themes of education, employment and economic inequalities, political and civil engagement, and

migration and the diaspora. Contributors to this volume bring many decades of experience of research with Pacific people as well as fresh perspectives from early career and graduate researchers. Most are anthropologists and their chapters contribute to the interdisciplinary fields of youth studies and Pacific studies, offering thought-provoking insights into the possibilities for Pacific youth as they face uncertain futures.

Science in the Forest, Science in the Past Willard McCarty, Geoffrey E. R. Lloyd, Aparecida Vilaça, 2022-03-29 *Science in the Forest, Science in the Past: Further Interdisciplinary Explorations* comprises of papers from the second of two workshops involving a group of scholars united in the conviction that the great diversity of knowledge claims and practices for which we have evidence must be taken seriously in their own terms rather than by the yardstick of Western modernity. Bringing to bear social anthropology, history and philosophy of science, computer science, classics and sinology among other fields, they argue that the use of such dismissive labels as 'magic', 'superstition' and the 'irrational' masks rather than solves the problem and reject counsels of despair which assume or argue that radically alien beliefs are strictly unintelligible to outsiders and can be understood only from within the system in question. At the same time, they accept that how to proceed to a better understanding of the data in question poses a formidable challenge. Key problems identified in the inaugural workshop, whose proceedings were published in *HAU: Journal of Ethnographic Theory* (2019) and in *HAU Books* (2020), provided the basis for asking how obvious pitfalls might be avoided and a new or revised framework within which to pursue these problems proposed. The chapters in this book were originally published in *Interdisciplinary Science Reviews*.
