Andrea Wulf

The Incredible Tide Alexander Key, 2014-07-29 A castaway on a rocky island is captured by a gang of evil men. He was born Conan of Orme, but Orme is no more. When nuclear war causes the oceans to swallow up the Western world, Conan escapes by chance, washing up on a craggy, desolate isle. After years of privilege, island life is a hard adjustment, but he grows strong—learning to fish, to make fire, and to befriend the birds. On moonless nights, he screams into the darkness, tortured by a loneliness he cannot overcome. One day, a ship appears on the horizon, and Conan believes himself saved. But for this young survivor, trouble is just beginning. The ship belongs to the New Order, cruel rulers who are rebuilding Earth through brute force. They send their new slave to the cutthroat city of Industria, intending to break his spirit. But Conan finds power on the island, and with it, he will remake the world.

The Invention of Nature Andrea Wulf, 2016-10-04 NATIONAL BESTSELLER • A biography of Alexander von Humboldt, the visionary German naturalist whose ideas changed the way we see the natural world—and in the process created modern environmentalism. • From the acclaimed author of *Magnificent Rebels*. Vivid and exciting.... Wulf's pulsating account brings this dazzling figure back into a dazzling, much-deserved focus." —The Boston Globe Alexander von Humboldt (1769-1859) was the most famous scientist of his age, a visionary German naturalist and polymath whose discoveries forever changed the way we understand the natural world. Among his most revolutionary ideas was a radical conception of nature as a complex and interconnected global force that does not exist for the use of humankind alone. In North America, Humboldt's name still graces towns, counties, parks, bays, lakes, mountains, and a river. And yet the man has been all but forgotten. In this illuminating biography, Andrea Wulf brings Humboldt's extraordinary life back into focus: his prediction of human-induced climate change; his daring expeditions to the highest peaks of South America and to the anthrax-infected steppes of Siberia; his relationships with iconic figures, including Simón Bolívar and Thomas Jefferson; and the lasting influence of his writings on Darwin, Wordsworth, Goethe, Muir, Thoreau, and many others. Brilliantly researched and stunningly written, *The Invention of Nature* reveals the myriad ways in which Humboldt's ideas form the foundation of modern environmentalism—and reminds us why they are as prescient and vital as ever.

Nathaniel's Nutmeg, Or, The True and Incredible Adventures of the Spice Trader who Changed the Course of History Giles Milton, 1999 In 1616, Nathaniel Courthope was dispatched to Run, the most lucrative of the Spice Islands to

hold off the massive Dutch Navy. But after a four-year siege, Britain ceded the island and its lucrative spice trade to Holland--in exchange for Manhattan.

DEL-Endurance Alfred Lansing,1993-01-21 The astonishing saga of polar explorer Ernest Shackleton's survival for over a year on the ice-bound Antarctic seas, as Time magazine put it, defined heroism. Alfred Lansing's scrupulously researched and brilliantly narrated book--with over 200,000 copies sold--has long been acknowledged as the definitive account of the Endurance's fateful trip.

The Revolt of the Public and the Crisis of Authority in the New Millennium Martin Gurri ,2018-12-04 How insurgencies—enabled by digital devices and a vast information sphere—have mobilized millions of ordinary people around the world. In the words of economist and scholar Arnold Kling, Martin Gurri saw it coming. Technology has categorically reversed the information balance of power between the public and the elites who manage the great hierarchical institutions of the industrial age: government, political parties, the media. The Revolt of the Public tells the story of how insurgencies, enabled by digital devices and a vast information sphere, have mobilized millions of ordinary people around the world. Originally published in 2014, The Revolt of the Public is now available in an updated edition, which includes an extensive analysis of Donald Trump’s improbable rise to the presidency and the electoral triumphs of Brexit. The book concludes with a speculative look forward, pondering whether the current elite class can bring about a reformation of the democratic process and whether new organizing principles, adapted to a digital world, can arise out of the present political turbulence.

Robert Boyle, Trailblazer of Science John Hudson Tiner,1989 A biography of the seventeenth-century Anglo-Irish scientist who, among his other accomplishments, is considered to be the founder of modern chemistry.

A Higher Call Adam Makos,Larry Alexander,2012-12-19 THE INTERNATIONAL BESTSELLER: “Beautifully told.”—CNN • “A remarkable story...worth retelling and celebrating.”—USA Today • “Oh, it’s a good one!”—Fox News A “beautiful story of a brotherhood between enemies” emerges from the horrors of World War II in this New York Times bestseller by the author of *Devotion*, now a Major Motion Picture. December, 1943: A badly damaged American bomber struggles to fly over wartime Germany. At the controls is twenty-one-year-old Second Lieutenant Charlie Brown. Half his crew lay wounded or dead on this, their first mission. Suddenly, a Messerschmitt fighter pulls up on the bomber’s tail. The pilot is German ace Franz Stigler—and he can destroy the young American crew with the squeeze of a trigger... What happened next would defy imagination and later be called “the most incredible encounter between enemies in World War II.” The U.S. 8th Air Force

would later classify what happened between them as “top secret.” It was an act that Franz could never mention for fear of facing a firing squad. It was the encounter that would haunt both Charlie and Franz for forty years until, as old men, they would search the world for each other, a last mission that could change their lives forever.

Albion's Seed David Hackett Fischer, 1991-03-14 This fascinating book is the first volume in a projected cultural history of the United States, from the earliest English settlements to our own time. It is a history of American folkways as they have changed through time, and it argues a thesis about the importance for the United States of having been British in its cultural origins. While most people in the United States today have no British ancestors, they have assimilated regional cultures which were created by British colonists, even while preserving ethnic identities at the same time. In this sense, nearly all Americans are Albion's Seed, no matter what their ethnicity may be. The concluding section of this remarkable book explores the ways that regional cultures have continued to dominate national politics from 1789 to 1988, and still help to shape attitudes toward education, government, gender, and violence, on which differences between American regions are greater than between European nations.

The Adventures of Alexander Von Humboldt Andrea Wulf, 2019-04-02 A breathtakingly illustrated and brilliantly evocative recounting of Alexander Von Humboldt's five-year expedition in South America—from the author of *Magnificent Rebels* and the New York Times bestseller *The Invention of Nature*. Alexander von Humboldt (1769-1859) was an intrepid explorer and the most famous scientist of his age. His restless life was packed with adventure and discovery, but his most revolutionary idea was a radical vision of nature as a complex and interconnected global force that does not exist for the use of humankind alone. His theories and ideas were profoundly influenced by a five-year exploration of South America. Now Andrea Wulf partners with artist Lillian Melcher to bring this daring expedition to life, complete with excerpts from Humboldt's own diaries, atlases, and publications. She gives us an intimate portrait of the man who predicted human-induced climate change, fashioned poetic narrative out of scientific observation, and influenced iconic figures such as Simón Bolívar, Thomas Jefferson, Charles Darwin, and John Muir. This gorgeous account of the expedition not only shows how Humboldt honed his groundbreaking understanding of the natural world but also illuminates the man and his passion.

Amazon Woman Darcy Gaechter, 2020-03-03 An extraordinary and inspiring chronicle of one woman's harrowing journey to become the first female to kayak the entire Amazon River. Part memoir, part feminist manifesto, *Amazon Woman* shows what incredible feats we are capable of and will encourage people, especially women, across all backgrounds and ages to find the courage and strength to live the life they've imagined. This 148-day journey began on Darcy Gaetcher's 35th birthday. The emotional waters that would fester and erupt on the ensuing journey was often more challenging to navigate than the mighty river itself. With blistering lips and irradiated fingernails, Darcy would tackle raging Class Five whitewater for twenty-five days straight, barely survived a dynamite-filled canyon being prepared for a new hydroelectric plan. She and

her two companions would encounter illegal loggers, narco-traffickers, murderous Shining Path rebels, and ruthless poachers in the black market trade in endangered species. In a desperate attempt meant to give her some pretense of control, Darcy even cut off all her hair before entering Peru's notoriously dangerous "Red Zone" in hopes of passing for a boy and being seen as less of a target. At once a heart-pounding adventure and a celebration of pushing personal limits, *Amazon Woman* speaks to all of us feeling trapped by our desk-bound, online society. This a story of finding the courage and strength to challenge nature, cultures, social norms, and oneself.

The Irishman's Daughter V.S. Alexander,2019-02-26 From the acclaimed author of *The Magdalen Girls* and *The Taster* comes a powerful, unforgettable novel of strength and resilience, set against the backdrop of the Irish famine. Ireland, 1845. To Briana Walsh, no place on earth is more beautiful than Carrowteige, County Mayo, with its sloping fields and rocky cliffs perched above the wild Atlantic. The small farms that surround the centuries-old Lear House are managed by her father, agent to the wealthy, reckless Sir Thomas Blakely. Tenant farmers sell the oats and rye they grow to pay rent to Sir Thomas, surviving on the potatoes that flourish in the remaining scraps of land. But when the potato crop falls prey to a devastating blight, families Briana has known all her life are left with no food, no resources, and no mercy from the English landowner, who seems indifferent to everything except profit. Rory Caulfield, the hard-working young farmer Briana hopes to marry, shares the locals' despair—and their anger. There's talk of violent reprisals against the callous gentry and their agents. Briana's studious older sister, Lucinda, dreams of a future far beyond Mayo. But even as hunger and disease settle over the country, killing and displacing millions, Briana knows she must find a way to guide her family through one of Ireland's darkest hours—toward hope, love, and a new beginning. Praise for V.S. Alexander's *The Taster* "This haunting and engrossing novel will appeal to fans of Anthony Doerr and Kristin Hannah." —Booklist "The 'taster's' story adds to a body of nuanced World War II fiction such as Elizabeth Wein's *Code Name Verity*, Anthony Doerr's *All the Light We Cannot See*, and Tatiana de Rosnay's *Sarah's Key*. Book clubs and historical fiction fans will love discussing this and will eagerly await more from Alexander." —Library Journal

The Cult of Smart Fredrik deBoer,2020-08-04 Named one of *Vulture's* Top 10 Best Books of 2020! Leftist firebrand Fredrik deBoer exposes the lie at the heart of our educational system and demands top-to-bottom reform. Everyone agrees that education is the key to creating a more just and equal world, and that our schools are broken and failing. Proposed reforms variously target incompetent teachers, corrupt union practices, or outdated curricula, but no one acknowledges a scientifically-proven fact that we all understand intuitively: Academic potential varies between individuals, and cannot be dramatically improved. In *The Cult of Smart*, educator and outspoken leftist Fredrik deBoer exposes this omission as the

central flaw of our entire society, which has created and perpetuated an unjust class structure based on intellectual ability. Since cognitive talent varies from person to person, our education system can never create equal opportunity for all. Instead, it teaches our children that hierarchy and competition are natural, and that human value should be based on intelligence. These ideas are counter to everything that the left believes, but until they acknowledge the existence of individual cognitive differences, progressives remain complicit in keeping the status quo in place. This passionate, voice-driven manifesto demands that we embrace a new goal for education: equality of outcomes. We must create a world that has a place for everyone, not just the academically talented. But we'll never achieve this dream until the Cult of Smart is destroyed.

Taking Fire Ron Alexander, Charles W. Sasser, 2007-04-01 Taking Fire is the incredible memoir by one of the most decorated chopper pilots to emerge from the Vietnam War. Nicknamed Mini-Man for his diminutive stature, a mere five-foot-three and 125 pounds in his flight boots, chopper pilot Ron Alexander proved to be a giant in the eyes of the men he rescued from the jungles and paddies of Vietnam. With an unswerving concern for every American soldier trapped by enemy fire, and a fearlessness that became legendary, Ron Alexander earned enough official praise to become the second most decorated helicopter pilot of the Vietnam era. Yet, for Ron, the real reward came from plucking his fellow soldiers from harm's way, giving them another chance to get home alive. In Taking Fire, Alexander and acclaimed military writer Charles Sasser transport you right into the cramped cockpit of a Huey on patrol, offering a bird's eye view of the Vietnam conflict. Packed with riveting action and gritty you-are-there dialogue, this outstanding book celebrates the everyday heroism of the chopper pilots of Vietnam.

Nathaniel's Nutmeg Giles Milton, 2014-06-10 A true tale of high adventure in the South Seas. The tiny island of Run is an insignificant speck in the Indonesian archipelago. Just two miles long and half a mile wide, it is remote, tranquil, and, these days, largely ignored. Yet 370 years ago, Run's harvest of nutmeg (a pound of which yielded a 3,200 percent profit by the time it arrived in England) turned it into the most lucrative of the Spice Islands, precipitating a battle between the all-powerful Dutch East India Company and the British Crown. The outcome of the fighting was one of the most spectacular deals in history: Britain ceded Run to Holland but in return was given Manhattan. This led not only to the birth of New York but also to the beginning of the British Empire. Such a deal was due to the persistence of one man. Nathaniel Courthope and his small band of adventurers were sent to Run in October 1616, and for four years held off the massive Dutch navy. Nathaniel's Nutmeg centers on the remarkable showdown between Courthope and the Dutch Governor General Jan Coen, and the brutal fate of the mariners racing to Run--and the other corners of the globe--to reap the huge profits of the spice trade. Written with the flair of a historical sea novel but based on rigorous research, Giles Milton's Nathaniel's Nutmeg is a brilliant adventure story by Giles Milton, a writer who has been hailed as the new Bruce Chatwin (Mail on Sunday).

Crazy Like Us Ethan Watters, 2010-01-12 “A blistering and truly original work of reporting and analysis, uncovering America’s role in homogenizing how the world defines wellness and healing” (Po Bronson). In *Crazy Like Us*, Ethan Watters reveals that the most devastating consequence of the spread of American culture has not been our golden arches or our bomb craters but our bulldozing of the human psyche itself: We are in the process of homogenizing the way the world goes mad. It is well known that American culture is a dominant force at home and abroad; our exportation of everything from movies to junk food is a well-documented phenomenon. But is it possible America's most troubling impact on the globalizing world has yet to be accounted for? American-style depression, post-traumatic stress disorder, and anorexia have begun to spread around the world like contagions, and the virus is us. Traveling from Hong Kong to Sri Lanka to Zanzibar to Japan, acclaimed journalist Ethan Watters witnesses firsthand how Western healers often steamroll indigenous expressions of mental health and madness and replace them with our own. In teaching the rest of the world to think like us, we have been homogenizing the way the world goes mad.
