*Cooperatives and Local Development* Christopher D. Merrett, Norman Walzer, 2016-09-16 First Published in 2004. The market economy has changed profoundly over the past two centuries. In the nineteenth century, business enterprises were largely single-product ventures, managed directly by the owners and rooted within national economies. In the twentieth century, firms employed managers who were not owners. Firms also evolved into multiproduct, multiunit entities that could employ thousands of workers. In the twenty-first century, many firms operate on a global scale, taking advantage of free trade policies and rapidly evolving computer and telecommunications technologies. Given this potential, it is crucial that producers, consumers, economic developers, and researchers realize how co-ops can promote local economic and community development. Hence, this book includes the perceptions of experts on a variety of cooperative issues, including the challenges involved in starting a co-op and in understanding its impact on surrounding communities. This book can be

especially useful because it provides the theoretical foundations and practical applications of cooperative behavior.

*Statistical Modeling and Inference for Social Science* Sean Gailmard,2014-06-09 Written specifically for graduate students and practitioners beginning social science research, *Statistical Modeling and Inference for Social Science* covers the essential statistical tools, models and theories that make up the social scientist's toolkit. Assuming no prior knowledge of statistics, this textbook introduces students to probability theory, statistical inference and statistical modeling, and emphasizes the connection between statistical procedures and social science theory. Sean Gailmard develops core statistical theory as a set of tools to model and assess relationships between variables - the primary aim of social scientists - and demonstrates the ways in which social scientists express and test substantive theoretical arguments in various models. Chapter exercises guide students in applying concepts to data, extending their grasp of core theoretical concepts. Students will also gain the ability to create, read and critique statistical applications in their fields of interest.

**Galula** A A. Cohen,2012-08-03 This comprehensive analytical biography is the definitive work on the life and writings of history's most significant counterinsurgency doctrinaire, David Galula, elucidating the context for his reflections and examining the present and future applicability of his treatise for scholars and practitioners alike. The product of years of extensive research made possible by exclusive access to Galula's personal papers as well as first-hand accounts from colleagues, family members, and friends, this book traces Galula's life from early childhood until death, describing his upbringing, education, and military career in the tumultuous historical context of his era. The author—a former counterinsurgency practitioner himself—pays particular attention to how the Chinese Revolution and the Algerian War affected Galula's views, and identifies Galula's mentors and the schools of thought within the French military that greatly influenced his writings. A conclusion illuminates the contemporary and likely future validity of his works. In the epilogue, the author speaks to Galula's influence over modern military thought and U.S. counterinsurgency doctrine. This book is essential reading for individuals with an interest in counterinsurgency, Galula's writings, or Galula himself, such as military officers and civilian administrators undertaking counterinsurgency courses and training.

Optical and Wireless Convergence for 5G Networks Abdelgader M. Abdalla,Jonathan Rodriguez,Issa Elfergani,Antonio Teixeira,2019-10-07 The mobile market has experienced unprecedented growth over the last few decades. Consumer trends have shifted towards mobile internet services supported by 3G and 4G networks worldwide. Inherent to existing networks are problems such as lack of spectrum, high energy consumption, and inter-cell interference. These limitations have led to the emergence of 5G technology. It is clear that any 5G system will integrate optical communications, which is already a mainstay of wide area networks. Using an optical core to route 5G data raises significant questions of how wireless and optical can coexist in synergy to provide smooth, end-to-end communication pathways. *Optical and Wireless Convergence for 5G Networks* explores new emerging technologies, concepts, and approaches for seamlessly integrating optical-wireless for

5G and beyond. Considering both fronthaul and backhaul perspectives, this timely book provides insights on managing an ecosystem of mixed and multiple access network communications focused on optical-wireless convergence. Topics include Fiber-Wireless (FiWi), Hybrid Fiber-Wireless (HFW), Visible Light Communication (VLC), 5G optical sensing technologies, approaches to real-time IoT applications, Tactile Internet, Fog Computing (FC), Network Functions Virtualization (NFV), Software-Defined Networking (SDN), and many others. This book aims to provide an inclusive survey of 5G optical-wireless requirements, architecture developments, and technological solutions.

Hashem Pesaran.

**Great Britain and the German Navy** E.L. Woodward, 2019-05-23 First published in 1935, in this volume E.L. Woodward reconstructs with his usual painstaking industry the various phases of Anglo-German naval relations from the enactment of the German navy laws of 1898-1900 to the months of the apparent détente just before the outbreak of war in 1914. The principle documentary collections have been carefully consulted and the material drawn from them is woven into an extended account of negotiations which for several years kept London and Berlin preoccupied with comparative shipbuilding programmes, fleet ratios and political formulas. With excellent judgement the author skilfully sets his central theme against the background of concurrent developments in the realm of European diplomacy. Though the importance of the Navy as an international power is indubitably diminished at the moment, the matter of the actual strength of the Navy is still a matter of controversy. To some extent today we can say of this book as the reviewer in *The Times Literary Supplement* said on its first publication in 1935: The circumstances of today in which naval competition has again begun may differ from those of thirty years ago; but those who read and digest this balanced and accurate account of that period will not fail to observe familiarities in the two situations.

**Interactions in Political Economy** Steven Pressman, 1996-08-08 In recent years there has been a growing dissatisfaction with standard economic theorising which has fostered the development of alternative ways of understanding how economies actually work. Too often though these approaches have been developed in isolation, or even in opposition to each other. However, *Interactions in Political Economy*, demonstra

**Phosphorylated Extracellular Matrix Proteins of Bone and Dentin** Michel Goldberg, 2012-09-11 *Phosphorylated Extracellular Matrix Proteins of Bone and Dentin* is the second volume of the e-book series *Frontiers between Science and*

Clinic in Odontology. The phosphorylated proteins of the extracellular matrix of bone and teeth play a crucial structural role in the two tissues. They also act as signaling molecules. Phosphorylated extracellular matrix proteins have been implicated in nucleation and mineralization of skeletal tissues. This e-book covers research on these specific proteins, including details about the cells producing these molecules, their impact on bone and teeth pathology (osteogenesis and dentinogenesis imperfecta) and the potential of these molecules in promoting or inhibiting mineralization. This e-book also explains processes under the control of some enzymes - TNAP and metalloproteases (MMPs) - such as intracellular regulation in bone and dentine, splicing, respective roles of cleavage products, SIBLINGs, nucleation and crystal growth and regulation. This second volume serves as a valuable reference to practicing odontologists, biology and biomaterials scientists and tissue engineers interested in protein research related to tooth and bone formation.

**Relativistic Cosmology** George F. R. Ellis, Roy Maartens, Malcolm A. H. MacCallum, 2012-03-22 Surveying key developments and open issues in cosmology for graduate students and researchers, this book focuses on the general concepts and relations that underpin the standard model of the Universe. It also examines anisotropic and inhomogeneous models, and deeper issues, such as quantum cosmology and the multiverse proposal.

**Coping with Caveats in Coalition Warfare** Gunnar Fermann, 2018-09-01 This book develops a framework for analysis, and a set of research strategies, to better understand the conditions and mechanisms involved in the considerable use of caveats by states contributing militarily to coalition operations. In the professional language of military servicemen, security analysts and decision-makers, "caveats" refers to the reservations on the use of force states put on their military contingents as a precondition to participate in particular multinational enforcement operations. Such understood caveats are an instrument of statecraft and foreign policy. However, caveats also are a potential threat to the integrity and military effectiveness of the coalition force in question, and, further down the road, an erosion on the fabric of security alliances. This volume is ideal for audiences interested in military and defence studies, security studies and coalition warfare.

Yuen,1998 This book attempts to revisit Singapore's urban experience since her independence three decades ago, and unfold the planning and development process behind its successful urban transformation. Topics covered by the chapters include: visionary planning; local planning; IT in planning practice; planning industrial estate development; urban conservation; recreation planning; and planning urban transportation.

**Representation and Structure in Economics** Hsiang-Ke Chao,2020-04-08 This book provides a methodological perspective on understanding the essential roles of econometric models in the theory and practice. Offering a comprehensive and comparative exposition of the accounts of models in both econometrics and philosophy of science, this work shows how econometrics and philosophy of science are interconnected while exploring the methodological insight of econometric modelling that can be added to modern philosophical thought. The notion of structure is thoroughly discussed throughout the book. The studies of the consumption function of Trygve Haavelmo, Richard Stone, Milton Friedman, David Hendry and Robert Lucas are taken as the case studies to investigate their methodological implications of model and structure. In addition to the semantic view of the scientific theories, various philosophical accounts concerning scientific models are used to shed light on the methodological nature of these consumption studies in economics. This book will be of great interest to scholars and students of methodology of economics and econometrics as well as anyone interested in the philosophy of science in an economic context.

**Progress in Parasitology** Heinz Mehlhorn,2011-08-03 Parasites threaten the health of animals and humans alike. Especially in times of increasing globalization and global warming, parasites can enlarge their “kingdom” by spreading. At the same time many of the existing medical products have become ineffective. As these products have been used for many decades, parasites have developed resistances, so that they have progressed in their fight for survival. Therefore it is obvious that humans must develop new methods to face these dangers. Thus parasitological knowledge increases daily and must be formulated to be accessible for as many parasitologists (veterinarians, physicians, biologists) as possible. Therefore it is necessary that reviews reflecting the present status of the progress in many fields of research be published. Therefore this book, published on the occasion of the 50th anniversary of the German Society of Parasitology, compiles 18 reviews on recent “hot topics,” including a new vaccine against malarial parasites; severe diseases with poor chances of treatment (cryptosporidiosis, coccidiosis, theileriosis); vectors (mosquitoes, ticks) and their transmission activities; and fish parasites, including molecular insights into the sex of parasites with a focus on the survival abilities that made them so dangerous. These chapters provide detailed information for researchers, as well as for teachers and students in parasitology.

**Applications of Evolutionary Computing** Mario Giacobini,Anthony Brabazon,Stefano Cagnoni,Aniko Ekart,Anna I. Esparcia-Alcázar,Muddassar Farooq,Andreas Fink,Penousal Machado,Jon McCormack,Michael O'Neill,Ferrante Neri,Mike

Preuss, Franz Rothlauf, Ernesto Tarantino, Shengxiang Yang, 2009-04-11 The year 2009 celebrates the bicentenary of Darwin's birth and the 150th anniversary of the publication of his seminal work, *On the Origin of Species*. If this makes 2009 a special year for the research community working in biology and evolution, the field of evolutionary computation (EC) also shares the same excitement. EC techniques are efficient, nature-inspired planning and optimization methods based on the principles of natural evolution and genetics. Due to their efficiency and simple underlying principles, these methods can be used in the context of problem solving, optimization, and machine learning. A large and ever-increasing number of researchers and professionals make use of EC techniques in various application domains.

This volume presents a careful selection of relevant EC applications combined with a thorough examination of the techniques used in EC. The papers in the volume illustrate the current state of the art in the application of EC and can help and inspire researchers and professionals to develop efficient EC methods for design and problem solving.
