The Urban Sketching Handbook: Understanding Perspective Stephanie Bower, 2016-06-15 A good sketch starts with good bones—this guide from an architectural illustrator shows how to think like an architect and master accurate perspective. This book in the Urban Sketching Handbook series uses drawings and simple steps to explain the often challenging and overwhelming concepts of perspective in practical and useful ways for on-site sketching. Most books are either too abstract or don't provide enough information that relates to what you actually do when you're out in the busy, wide world about to start a drawing. Where do you start? How do you edit what you see to flatten and shrink it onto your paper? How does perspective work? The Urban Sketching Handbook: Understanding Perspective helps you learn to think like an architect, to draw buildings and spaces by reducing what you see to simple, basic shapes, then adding layers in simple steps, and finally finishing your sketch with detail, tone, and color—in accurate perspective. Full of helpful tips, it even deconstructs sketches to show you how to create them! Once you understand perspective, it will change the way you see the world—you'll see perspective everywhere. Key concepts explored in this volume include: Basic Terms * Basic Spatial Principles * Types of Perspective * Building a Sketch in Layers * Special Conditions

Interior Design Illustrated Christina M. Scalise,2014-08-06 In an age of reliance on CAD programs, the skill to express your creativity and vision with a hand-rendered drawing gives an interior designer a distinct advantage in communicating with clients and will set you apart from other designers. Developing strong hand visual communication skills without the aid of a computer are especially important to concept development in the interior design profession, and ideation flows rapidly when drawing manually. Building on the success of the First Edition, *Interior Design Illustrated* helps students develop this powerful marketing tool, making them invaluable to their employers. The step-by-step approach, with simple, uncomplicated illustrations and instructions that progress from beginner to intermediate skill levels, teaches students how to visualize interior space, perspective and details (such as pattern and texture) and to render their vision with markers and watercolors. Since the lessons are structured around small tasks, students will become proficient with one rendering skill before moving on to another. The text and numerous illustrations reinforce each other to make the lessons easily accessible to visual

learners. The comprehensive coverage includes architectural features, wall and floor finishes, furniture, and design enhancements such as artwork, plants, tabletops, and accessories.

Crisis Sylvia Walby, 2015-10-30 We are living in a time of crisis which has cascaded through society. Financial crisis has led to an economic crisis of recession and unemployment; an ensuing fiscal crisis over government deficits and austerity has led to a political crisis which threatens to become a democratic crisis. Borne unevenly, the effects of the crisis are exacerbating class and gender inequalities. Rival interpretations – a focus on ‘austerity’ and reduction in welfare spending versus a focus on ‘financial crisis’ and democratic regulation of finance – are used to justify radically diverse policies for the distribution of resources and strategies for economic growth, and contested gender relations lie at the heart of these debates. The future consequences of the crisis depend upon whether there is a deepening of democratic institutions, including in the European Union. Sylvia Walby offers an alternative framework within which to theorize crisis, drawing on complexity science and situating this within the wider field of study of risk, disaster and catastrophe. In doing so, she offers a critique and revision of the social science needed to understand the crisis.

The Art of Remembering Yat Ming Loo, Hua Li, Jing Xie, Eugenio Mangi, 2024-05-31 Focusing on the non-Western context and case studies, this book explores theories of interdisciplinary architectural thinking and the construction of urban memory in Chinese cities, with an emphasis on contemporary architecture and the diversity of agencies. China has undergone one of the fastest urbanisation and urban renewal processes in human history, but discussions of urban memory in China have tended to be practice-oriented and lack theoretical reflection. This book brings together interdisciplinary architectural scholarship to interrogate the production of urban memory and examine experiences in China. The 14 chapters explore different processes, projects, materials, architecture and urban spaces in different Chinese cities by analysing cityscapes such as temples, bridges, conservation projects, architectural design, historical architecture, memorial hall, market street, city images, custom bike, food market and so on. The book deals with different agencies and methods, tangible and intangible, in the construction of memories aimed at promoting hybridised multiple identities, and explores the interplay of different versions of memory, i.e. state, public, regional, local, individual and collective memory. This book will be essential reading for scholars and students of architecture and urbanism, cultural studies and China studies, as well as architects, urban planners and historians interested in these fields.

Understanding China's Urbanization Li Zhang, Richard LeGates, Min Zhao, 2016-03-25 China's urbanization is one of the great earth-changing phenomena of recent times. The way in which China continues to urbanize will have a critical impact on the world economy, global climate change, international relations and a host of other critical issues. Understanding and responding to China's urbanization is of paramount importance to everyone. This book represents a unique exploration of the demographic, spatial, economic and social aspects of China's urban transformation. Based on years of fieldwork and data analysis from different types of cities and towns in every region of China, the authors present a detailed description of how China has urbanized since 1978 and an original theory about the way in which top-down and bottom-up policies have impacted urbanization. They describe China's on-going urbanization process as a 'double-dual' transformation from a planned economy to a more market-oriented one and from a concern with the quantity to the quality of urbanization. In doing so, the authors provide the most comprehensive and up-to-date book on Chinese urbanization to date. This scholarly study will appeal to academics and practitioners, including professors and postgraduate students of urban studies, planning, geography, Asian studies, and other social science disciplines and professional fields concerned with cities and urban development. Professionals involved in international development, particularly in China and elsewhere in Asia, will be particularly interested in the book.

How To Think About Cities Deborah G. Martin, Joseph Pierce, 2022-11-29 Cities are raucous, cacophonous, and complex. Many dimensions of life play out and conflict across cities' intricate landscapes, be they political, cultural, economic, or social. Urban policy makers and analysts often attempt to "cut through the noise" of urban disagreement by emphasizing a dominant lens for understanding the key, central logic of the city. *How To Think About Cities* sees this tendency to selective

vision as misleading and ultimately unjust: cities are many things at once to different people and communities. This book describes the various ways of seeing the functions and landscapes of the city as place frames, and the constant process of negotiating which place frames best explain the city as place-making. Martin and Pierce call for an explicitly hybrid perspective that shifts between many different frames for making sense of cities. This approach highlights how any given stance opens up some lines of inquiry and understanding while closing off others. Thinking of cities as sites of contested perspectives promotes a synthetic approach to urban analysis that emphasizes difference and political possibility. This mosaic view of the city will be a welcome read for those within urban studies, geography, and social sciences exploring the many faces of urban life.

Oil and Water Tom Cliff,2016-06-10 For decades, China's Xinjiang region has been the site of clashes between long-residing Uyghur and Han settlers. Up until now, much scholarly attention has been paid to state actions and the Uyghur's efforts to resist cultural and economic repression. This has left the other half of the puzzle—the motivations and ambitions of Han settlers themselves—sorely understudied. With *Oil and Water*, anthropologist Tom Cliff offers the first ethnographic study of Han in Xinjiang, using in-depth vignettes, oral histories, and more than fifty original photographs to explore how and why they became the people they are now. By shifting focus to the lived experience of ordinary Han settlers, *Oil and Water* provides an entirely new perspective on Chinese nation building in the twenty-first century and demonstrates the vital role that Xinjiang Han play in national politics—not simply as Beijing's pawns, but as individuals pursuing their own survival and dreams on the frontier.

Drawing Futures Bob Sheil,Frédéric Migayrou,Luke Pearson,Laura Allen,2016-11-11 *Drawing Futures* brings together international designers and artists for speculations in contemporary drawing for art and architecture.Despite numerous developments in technological manufacture and computational design that provide new grounds for designers, the act of drawing still plays a central role as a vehicle for speculation. There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world. In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world, the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation. *Drawing Futures* will present a compendium of projects, writings and interviews that critically reassess the act of drawing and where its future may lie.*Drawing Futures* focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments. The book coincides with an international conference of the same name, taking place at The Bartlett School of Architecture, UCL, in November 2016. Bringing together practitioners from many creative fields, the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas.
