Assessment of the National Science Foundation's 2015 Geospace Portfolio Review National Academies of Sciences, Engineering, and Medicine,Division on Engineering and Physical Sciences,Space Studies Board,Committee on Assessment of the National Science Foundation's 2015 Geospace Portfolio Review,2017-04-28 At the request of the Advisory Committee for Geosciences of the National Science Foundation (NSF), a review of the Geospace Section of the NSF Division of Atmospheric and Geospace Sciences was undertaken in 2015. The Portfolio Review Committee was charged with reviewing the portfolio of facilities, research programs, and activities funded by Geospace Section and to recommend critical capabilities and the balance of investments needed to enable the science program articulated in the 2013 NRC decadal survey Solar and Space Physics: A Science for a Technological Society. The Portfolio Review Committee's report Investments in Critical Capabilities for Geospace Science 2016 to 2025 (ICCGS) was accepted by the Advisory Committee for Geosciences in April 2016. Assessment of the National Science Foundation's 2015 Geospace Portfolio Review provides an independent assessment of the ICCGS report. This publication assesses how well the ICCGS provides a clear set of findings, conclusions, and recommendations for Geospace Section that align with the science priorities of the NRC decadal survey, and adequately take into account issues such as the current budget outlook and the science needs of the community. Additionally, this study makes recommendations focused on options and considerations for NSF's implementation of the ICCGS recommendations.

SBIR at the National Science Foundation National Academies of Sciences, Engineering, and Medicine,Policy and Global Affairs,Board on Science, Technology, and Economic Policy,Committee on Capitalizing on Science, Technology, and Innovation: An Assessment of the Small Business Innovation Research ProgramâPhase II,2015-12-17 The Small Business Innovation Research (SBIR) program is one of the largest examples of U.S. public-private partnerships, and was established in 1982 to encourage small businesses to develop new processes and products and to provide quality research in support of the U.S. government's many missions. The U.S. Congress tasked the National Research Council with undertaking a

comprehensive study of how the SBIR program has stimulated technological innovation and used small businesses to meet federal research and development needs, and with recommending further improvements to the program. In the first round of this study, an ad hoc committee prepared a series of reports from 2004 to 2009 on the SBIR program at the five agencies responsible for 96 percent of the program's operations-including the National Science Foundation (NSF). Building on the outcomes from the first round, this second round presents the committee's second review of the NSF SBIR program's operations. Public-private partnerships like SBIR are particularly important since today's knowledge economy is driven in large part by the nation's capacity to innovate. One of the defining features of the U.S. economy is a high level of entrepreneurial activity. Entrepreneurs in the United States see opportunities and are willing and able to assume risk to bring new welfare-enhancing, wealth-generating technologies to the market. Yet, although discoveries in areas such as genomics, bioinformatics, and nanotechnology present new opportunities, converting these discoveries into innovations for the market involves substantial challenges. The American capacity for innovation can be strengthened by addressing the challenges faced by entrepreneurs.

The Data Book Meredith Zozus,2017-07-12 *The Data Book: Collection and Management of Research Data* is the first practical book written for researchers and research team members covering how to collect and manage data for research. The book covers basic types of data and fundamentals of how data grow, move and change over time. Focusing on pre-publication data collection and handling, the text illustrates use of these key concepts to match data collection and management methods to a particular study, in essence, making good decisions about data. The first section of the book defines data, introduces fundamental types of data that bear on methodology to collect and manage them, and covers data management planning and research reproducibility. The second section covers basic principles of and options for data collection and processing emphasizing error resistance and traceability. The third section focuses on managing the data collection and processing stages of research such that quality is consistent and ultimately capable of supporting conclusions drawn from data. The final section of the book covers principles of data security, sharing, and archival. This book will help graduate students and researchers systematically identify and implement appropriate data collection and handling methods.

The Oxford Handbook of Interdisciplinarity Robert Frodeman,Julie Thompson Klein,Roberto C. S. Pacheco,2017 Interdisciplinarity has become as important outside academia as within. Academics, policy makers, and the general public seek insights to help organize the vast amounts of knowledge being produced, both within research and at all levels of

education. The second edition of *The Oxford Handbook of Interdisciplinarity* offers a thorough update of this major reference work, summarizing the latest advances within the field of inter- and transdisciplinarity. The collection is distinguished by its breadth of coverage, with chapters written by leading experts from multiple networks and organizations. The volume is edited by respected interdisciplinary scholars and supported by a prestigious advisory board to ensure the highest quality and breadth of coverage. *The Oxford Handbook of Interdisciplinarity* provides a synoptic overview of the current state of interdisciplinary research, education, administration and management, and of problem solving-knowledge that spans the disciplines and interdisciplinary fields. The volume negotiates the space between the academic community and society at large. Offering the most broad-based account of inter- and transdisciplinarity to date, its 47 chapters provide a snapshot of the state of knowledge integration as interdisciplinarity approaches its century mark. This second edition expands its coverage to discuss the emergence of new fields, the increase of interdisciplinary approaches within traditional disciplines and professions, new integrative approaches to education and training, the widening international presence of interdisciplinarity, its increased support in funding agencies and science-policy bodies, and the formation of several new international associations associated with interdisciplinarity. This reference book will be a valuable addition to academic libraries worldwide, important reading for members of the sciences, social sciences, and humanities engaged in interdisciplinary research and education, and helpful for administrators and policy makers seeking to improve the use of knowledge in society.

The Routledge Handbook of Scientific Communication Cristina Hanganu-Bresch, Michael J. Zerbe, Gabriel Cutrufello, Stefania M. Maci, 2021-12-20 Given current science-related crises facing the world such as climate change, the targeting and manipulation of DNA, GMO foods, and vaccine denial, the way in which we communicate science matters is vital for current and future generations of scientists and publics. *The Routledge Handbook of Scientific Communication* scrutinizes what we value, prioritize, and grapple with in science as highlighted by the rhetorical choices of scientists, students, educators, science gatekeepers, and lay commentators. Drawing on contributions from leading thinkers in the field, this volume explores some of the most pressing questions in this growing field of study, including: How do issues such as ethics, gender, race, shifts in the publishing landscape, and English as the lingua franca of science influence scientific communication practices? How have scientific genres evolved and adapted to current research and societal needs? How have scientific visuals developed in response to technological advances and communication needs? How is scientific communication taught to a variety of audiences? Offering a critical look at the complex relationships that characterize current scientific communication practices in academia, industry, government, and elsewhere, this Handbook will be essential reading for students, scholars, and professionals involved in the study, practice, and teaching of scientific, medical, and technical communication.

Grantsmanship for New Investigators Thomas F. Hilton, Carl G. Leukefeld, 2018-10-30 This compact resource analyzes and demystifies the processes of applying for, competing for, and getting funding for research. Neither a cookbook nor a template, it encourages readers to apply the critical thinking and attention to detail they use in their investigations to the pursuit of the grant. Chapters delve into choosing among funding options, project planning and writing, filling out the materials in the application packet, and troubleshooting for problems at various steps of the journey. Along the way, the authors also explore common myths of grantsmanship and alert readers to hidden pitfalls that can get an otherwise good submission rejected. Among the core skill areas covered:

- Using strategic thinking throughout the application process
- Understanding the major grant mechanisms
- Navigating the grant timeline, including the peer review and the vetting process
- Writing the effective project description
- Following up if the project is not funded or funding is deferred
- Building a career grant by grant

Brimming with expert knowledge, *Grantsmanship for New Investigators* ably balances motivation with realism. The authors' deep understanding and experience of how funding agencies arrive at judgments will inspire readers to present their research in the most convincing manner.

Mentoring at Minority Serving Institutions (MSIs) Jeton McClinton, David S. B. Mitchell, Mark A. Melton, Gerunda B. Hughes, Tyrell Carr, 2018-05-01 The primary thrust of the proposed volume is to provide information for higher education minority serving institutions (MSIs) and other institutions and individuals interested in providing and/or improving mentoring programs and services to a variety of target groups. The editors are interested in how mentorship can produce beneficial outcomes for the mentor that may be similar to or different from outcomes in other educational contexts. Thus, the purpose of this volume is to showcase, through case studies and other forms of empirical research, how successful mentoring programs and relationships at MSIs have been designed and implemented. Additionally, we will examine the various definitions and slight variations of the meaning of the construct of mentoring within the MSI context. It is our intent to share aspects of mentoring programs and relationships as well as their outcomes that have heretofore been underrepresented and underreported in the research literature.

Optimizing the Nation's Investment in Academic Research National Academies of Sciences, Engineering, and Medicine, Policy and Global Affairs, Board on Higher Education and Workforce, Committee on Science, Technology, and Law, Committee on Federal Research Regulations and Reporting Requirements: A New Framework for Research Universities in the 21st Century, 2016-07-29 Research universities are critical contributors to our national research enterprise. They are the principal source of a world-class labor force and fundamental discoveries that enhance our lives and the lives of others around the world. These institutions help to create an educated citizenry capable of making informed and crucial choices as participants in a democratic society. However many are concerned that the unintended cumulative effect of federal regulations undercuts the productivity of the research enterprise and diminishes the return on the federal investment in

research. Optimizing the Nation's Investment in Academic Research reviews the regulatory framework as it currently exists, considers specific regulations that have placed undue and often unanticipated burdens on the research enterprise, and reassesses the process by which these regulations are created, reviewed, and retired. This review is critical to strengthen the partnership between the federal government and research institutions, to maximize the creation of new knowledge and products, to provide for the effective training and education of the next generation of scholars and workers, and to optimize the return on the federal investment in research for the benefit of the American people.

Outcomes Based Funding and Race in Higher Education Tiffany Jones, Sosanya Jones, Kayla C. Elliott, LaToya Russell Owens, Amanda E. Assalone, Denisa Gándara, 2017-03-30 This book examines how Performance or Outcomes Based Funding (POBF) policies impact racial equity in higher education. Over the last decade, higher education has become entrenched in a movement that holds colleges and universities more accountable to its supporters. There are pressures to answer questions about student outcomes and performance, the value of education, the effectiveness of instructors, and the ability of existing leaders to manage efficiently and effectively. It is within this climate that states have adopted POBF policies. Through POBF, public colleges and universities receive state funding through formulas that no longer rely solely on student enrollment, but are instead based on student outcomes. This book provides an overview for policymakers of how racial equity has been addressed, the impact of these approaches, and recommendations for moving forward.

Origin of Mass and Strong Coupling Gauge Theories (SCGT15) Aoki Yasumichi, Maskawa Toshihide, Nojiri Shin'ichi, 2017-12-06 This volume contains contributions to the workshop, which was largely focused on the strong coupling gauge theories in search for theories beyond the standard model, particularly, the LHC experiments and lattice studies of conformal fixed point. The main topics include walking technicolor and the role of conformality in view of the 125 GeV Higgs as a light composite Higgs (technidilaton, and other composite Higgs, etc.). Nonperturbative studies like lattice simulations and stringy/holographic approaches are extensively discussed in close relation to the phenomenological studies. After the discovery of 125 GeV Higgs at LHC, the central issue of particle physics is now to reveal the dynamical origin of the Higgs itself. One of the possibilities would be the composite Higgs based on the strong coupling gauge theory in the TeV region, such as the technidilaton predicted in walking technicolor with infrared conformality. The volume contains, among others, many of the latest important reports on walking technicolor and related subjects in the general context of conformality, in a way of direct relevance to the LHC phenomenology as well as the lattice studies. It is very timely to study full theoretical implications in the exciting era when the LHC is vigorously working. This volume is of great importance for that purpose. Speakers of 40 talks (plus posters) include K-I Aoki, Y Aoki, K Bamba, E Bennett, R S Chivukula, H Georgi, A Hasenfratz, D-K Hong, K Itoh, D Elander, G Fleming, H Fukano, Y Iwasaki, M Jarvinen, D Kadon, S Kim, R Kitano, K-I Kondo, J Kuti, D Lin, N Maru, H Matsufuru, S Matsuzaki, K-I Nagai, C Nonaka, H Ohki, E Pallante, M Rho, E Rinaldi, F Sannino, D Schaich, A Shibata, R E Shrock, E H Simmons, K Tuominen, C H Wong, N Yamada, M J S Yang, and K Yamawaki.
