The Creative Curriculum for Infants, Toddlers & Twos Diane Trister Dodge, Sherrie Rudick, Kai-leé Berke, Amy Laura Dombro, 2006 Helps teachers appreciate and find joy in the everyday discoveries that delight a child, and helps them to thoughtfully observe and use what they learn, to respond to children's interests and needs.

*Teaching Infants, Toddlers, and Twos with Special Needs* Clarissa Willis, 2009 Easy-to-implement strategies for teaching infants, toddlers, and twos with special needs. Placing children with special needs in environments that include typically developing peers has become commonplace as continuing research confirms that all children benefit and learn from each other as well as from their teachers. Teaching Infants, Toddlers, and Twos with Special Needs is written for all teachers and directors who work with infants, toddlers, and twos, including special educators and educators working with typically developing children. This book specifically addresses the needs of children with developmental delays, as well as children at risk for developing special needs. Each chapter includes information about how infants, toddlers, and twos learn. The strategies and adaptations in each chapter are easy to use and apply to all children. Examples are presented for managing the physical environment and for teaching skills that will enhance the overall development of infants, toddlers, and twos with special needs.

**Endless Opportunities for Infant and Toddler Curriculum** Sandra H. Petersen, Donna Sasse Wittmer, 2009 This curriculum book presents the infant-toddler care preservice or practicing teacher with research-based activities and developmentally appropriate practices for interactions, environments, and routines. **Teaching and Learning with Infants and Toddlers** Mary Jane Maguire-Fong,2020 In the short span of three years, infants learn to move with confidence and grace, to converse with ease, to investigate and solve problems, and to help others in need—building an exquisite foundation for all learning that follows. Maguire-Fong has updated her groundbreaking book designed to assist pre- and inservice professionals working with infants and their families. Each chapter draws from research and real-life infant care settings to provide valuable insights into how to design an infant care program, plan curriculum, assess learning, and work with families. This popular resource is inspired by the philosophy of early childhood education developed in the schools in Reggio Emilia, Italy; from the work of Magda Gerber and Emmi Pikler; and from the many dedicated researchers intent on figuring out how infants make meaning. Praise for the First Edition! “From its clear explanation of the developing brain of a baby to its enlightened presentation on the art of reflective childcare, I see how

many times I will use this work as a resource.” —From the Foreword by J. Ronald Lally, Center for Child and Family Studies, WestEd “Filled with so many great ideas, evocative illustrations, and practical considerations.” —Ross A. Thompson, University of California, Davis “Here is everything you ever wanted to know about very young children as ‘born researchers.’” —Elizabeth Jones, faculty emerita, Pacific Oaks College “Students of early childhood need to have all these important thoughts in their heads. —Bev Bos, speaker, director, and teacher

**Loose Parts 2** Miriam Beloglovsky, Lisa Daly, 2016-06-20 Loose parts capture children's curiosity, give free reign to their imagination, and encourage creativity. This form of play allows infants to be in control and recognize the power of their bodies and actions. A variety of new and innovative loose parts ideas are paired with beautiful photography to inspire safe loose parts play in your infant and toddler environments. Captivating classroom stories and proven science provide the context for how this style of play supports children's development and learning. This book is perfect for Montessori and Reggio-inspired programs and educators.

**Mathematizing** Allen C. Rosales, 2015-07-20 This proven, accessible approach to a curriculum presents a learner-centered approach to math education. Mathematizing provides both the emergent curriculum and professional development frameworks to help young children learn math throughout their everyday routine and to facilitate teachers' understanding of how to see and support children's math learning at every turn. With this book and its plentitude of case studies, illustrations, photographs, and documentation, the mathematizing adult can interpret children's interests and use that knowledge as a catalyst for creating meaningful and purposeful mathematical lessons and interactions.

**Teaching Terrific Twos and Other Toddlers** Terry Lynne Graham, 1998-05 When two-year olds begin in nursery schools and day care centers, they need activities specially designed to expand their capabilities and interests. The activities, which both teachers and children will enjoy, develop self-image, listening, language, social growth, movement, science, math, and music. These activities will keep a young toddler's mind as active as a toddler's body. It includes introductory sections covering basic and individual goals, classroom arrangement, scheduling, discipline, materials, parent involvement, and assessment. Shape Walks, Mitten Week, Bunny May I, and many other activities make this book an incredible resource.

*Transforming the Workforce for Children Birth Through Age 8* National Research Council, Institute of Medicine, Board on Children, Youth, and Families, Committee on the Science of Children Birth to Age 8: Deepening and Broadening the Foundation for Success, 2015-07-23 Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who

contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.
