The Historiography of Persian Architecture Mohammad Gharipour,2015-08-27 Historiography is the study of the methodology of writing history, the development of the discipline of history, and the changing interpretations of historical events in the works of individual historians. Exploring the historiography of Persian art and architecture requires a closer look at a diverse range of sources, including chronicles, historical accounts, travelogues, and material evidence coming from archaeological excavations. The Historiography of Persian Architecture highlights the political, cultural, and intellectual contexts that lie behind the written history of Persian architecture in the twentieth century, presenting a series of investigations on issues related to historiography. This book addresses the challenges, complexities, and contradictions regarding historical and geographical diversity of Persian architecture, including issues lacking in the 20th century historiography of Iran and neighbouring countries. This book not only illustrates different trends in Persian architecture but also clarifies changing notions of research in this field. Aiming to introduce new tools of analysis, the book offers fresh insights into the discipline, supported by historical documents, archaeological data, treatises, and visual materials. It brings together well-established and emerging scholars from a broad range of academic spheres, in order to question and challenge pre-existing historiographical frameworks, particularly through specific case studies. Overall, it provides a valuable contribution to the study of Persian architecture, simultaneously revisiting past literature and advancing new approaches. This book would be of interest to students and scholars of Middle East and Iranian Studies, as well as Architectural History, including Islamic architecture and historiography.

MANAGING NATURAL RESOURCES HARIKESH N. MISRA,2014-03-13 Natural resource management and sustainable development has, of late, assumed great importance, especially because of ecological crisis and environmental dangers which are looming large. Today the issues related to natural resource exploitation, consequences, their conservation, preservation and management leading to sustainable development have become the major thrust areas of teaching and research. Also, sustainability of natural resources, especially water and land resources, and their efficient use is one of the core programmes of Government of India's Twelfth Five Year Plan (2012-2017) for strategic development; this objective can only be achieved if the resources are used judiciously. Although land and water resources—the focus of the present book—are vital for human survival and development, unfortunately both are under threat and are increasing strain worldwide. These resources have

wide and significantly varying implications in rural and urban settlements, especially in India, where population has been continuously growing and, therefore, the demand of land and water is intensifying. This has necessitated urgent need for reviewing the availability of land and water resources and their conservation. Besides dealing with the theoretical aspects, this compendium presents case studies on natural resources as well, which reveal ground realities at micro and meso levels too. Pedagogical features like maps, diagrams, satellite imageries and latest database of the primary and secondary nature distinguish this book from other works on the subject. The book will be of immense use to postgraduate students and research scholars of geography and related disciplines such as rural-urban studies and environmental science. The thematic approach of the book provides reasonably good contents for cogitation to researchers. Policy makers, planners and academicians may also be benefitted while framing futuristic norms which may lead to sustainable development—the ultimate goal. AUDIENCE • Postgraduate students and Research Scholars of Geography. • Policy makers, Planners and Academicians

Power, Politics, and Rural Development Georges Kristoffel Lieten, 2003 Based on fifteen years of intensive anthropological and sociological fieldwork, this book presents provocative insights in the daily life of men and women in various villages of India. The topics dealt with are varied as also important and policy relevant. The author deals with the propensity of the village panchayats and their actual working in Uttar Pradesh and West Bengal, the impact of land reforms on development, the causes of the high human development index in Kerala, communalism at the village level, the views of poor villagers on the post-modernist views on development, child labour and family views on children as capital, and with the changing world view in relation to religion, caste and the position of women. The author deals with these issues drawing on a multifaceted background, taking care at the same time that the views of the villagers, and their daily concerns come through as the principal empirical evidence.

Livelihood Enhancement Through Agriculture, Tourism and Health Narayan Chandra Jana, Anju Singh, R. B. Singh, 2022-01-18 Agriculture is the backbone of our economic system. It provides not only food and raw material but also employment opportunities to a very large number of people. Higher atmospheric temperature has an impact on crop yields while the changes in rainfall could affect both crop quality and quantity. Climate change, therefore, could increase the prices of major crops in some regions. For the most vulnerable people, lower agricultural output means lower income. In addition, climate change is expected to increase the risk of illness and death from extreme heat and poor air quality. Recent evidence is the COVID-19 pandemic. Furthermore, climate change also affects the occurrence of other infectious diseases. A number of well-known diseases are climate-sensitive - malaria, dengue fever, and cholera among others. Tourism is considered as an industry and alternative contributor to a nation's income. It can generate employment opportunities and boost up the economy. This book, consisting of 26 chapters, focuses on the issues of agriculture, tourism and health for livelihood enhancement. It is essential to discuss these diverse issues in the field of geography as it encompasses interdisciplinary topics. The range of concerns at the national, regional and local levels is not confined to geography only but also involves other disciplines as well. Therefore, this book is a valuable source for scientists and researchers in allied fields such as livelihood, agriculture, land use, tourism management, health care and tribal studies. Furthermore, this book can be of immense help to the researchers, planners and decision makers engaged in solving problems in these areas in developing countries and beyond.

Zodiac Lovers JJ Persis, 2014 When she was just a child, Mojdeh's life changed. The daughter of a private bodyguard of the last king of Iran, her five-year-old sense of the world couldn't comprehend what was happening. Her father's ties to

Mohammed Reza Shah meant that her entire family would be forced into exile. Her new life in America inspired a love and loyalty she never imagined toward her homeland. Growing up in a foreign country and culture, Mojdeh did her best to fit in with society. She never let go of her true heritage. Instead, she embraced it and allowed it to shape her. After graduating from college, Mojdeh began a new chapter in her life. Leaving her parents and siblings behind in Texas, she moved to California with the big dreams of finding both a writing career and the love of her life. A true Gemini, she used her positive attitude to overcome hurdles. A lack of romantic insight translated into three unsuccessful attempts at love. Each man was from a different walk of life, but they shared one crucial quality: they were Iranian. In her mid-thirties, she came to an epiphany that allowed her to find her true love. For Mojdeh, life was finally complete, but her happiness was not destined to last. Forged in fire, turmoil, and disappointment, her optimistic Gemini soul allowed her to discover the clarity and strength needed to find her true identity and be at peace.
