The Globalization of Natural Gas Markets Manfred Hafner, Simone Tagliapietra, 2013 Over the last decades, the European gas industry has experienced extraordinary success. A strongly interconnected network of gas pipelines has been developed inside and around Europe, and the liquefied natural gas (LNG) trade has also expanded rapidly. However, the European gas industry is now facing a number of new challenges and opportunities, related to both its demand and supply sides. On the demand side, the ambitious EU de-carbonization targets have led to an unprecedented uncertainty of the EU future gas demand. In fact, the implementation of a climate-based energy policy in Europe challenges the role of natural gas in the long-term European energy mix. Also, natural gas could play an important and cost effective role in the transition towards a low carbon economy. On the supply side, new natural gas supplies are emerging around the world, mainly because of an increase in the global LNG supply and the shale gas revolution in the US. This unprecedented shift in the supply/demand balance is creating new dynamics also in the European gas industry, regarding both the EU security of gas supply architecture and the EU gas pricing mechanism. This book provides a comprehensive analysis of all these challenges and opportunities affecting the European gas industry, providing a clear snapshot of a market characterized by growing uncertainty and volatility. (Series: European Energy Studies - Vol. 6)

Creativity and Innovation in Entrepreneurship S S Khanka,2021-08-03 Creativity and innovation as hallmarks of entrepreneurship have been recognized as the modern-day mantra for success in business and industry. It is with this realization, the Government of India, by announcing a number of policies and schemes, has been giving ever-increasing emphasis on developing creativity and innovation in entrepreneurship in the country. So much so, an increasing number of educational institutions in the country have started offering the paper on creativity and innovation in entrepreneurship in their course curricula. Because Creativity and Innovation in Entrepreneurship, as a subject, is relative of recent origin in India, there has so far not been any comprehensive textbook available on the subject in the Indian context. The present book is a modest attempt to fill in this gap.

World Development Report 1980 ,1980 Abstract: Developing countries start the decade facing two major challenges: to continue the social and economic progress of the past 30 years in an international climate that looks less helpful; and to tackle the plight of the 800 million people living in absolute poverty, who have benefitted too little from past progress. This report examines some of the difficulties and prospects in both areas. One of its central themes is the importance of people in development. The first part of the report addresses the expected sluggish world economic growth as oil-importing countries reduce their current account deficits and adapt to higher energy costs. Domestic policies of developing countries will be crucial, and the fate of poor people in these countries will be decided largely by domestic opportunities and policies. The second part of the report describes the role of human development programs (in education, health, nutrition, and fertility reduction) and their related effects on productivity and population growth.
