Transport, Environment and Health World Health Organization. Regional Office for Europe,2000 This book brings together the scientific evidence on the main effects of transport on human health and the environment. It sets the conceptual framework for future analyses of the health burden and health gains from transport policies. It outlines how these health concerns have been reflected in policy tools such as impact assessment, regulation and economic analysis, and identifies the areas where action is most needed. Discussions of the environment and health effects of transport need to be communicated in a way that is relevant for policy-makers and easily understood by nonscientists. That is the aim of this book, which summarizes the results of extensive reviews of the issues prepared by groups of prominent international experts. It is also planned to release the reviews themselves, to give a more detailed account of the scientific evidence. [Foreword]

*Successfully Implementing Turnaround Strategies in State-Owned Companies: SAA, Kenya Airways and Ethiopian Airlines as Case Studies* Kaizer Mabhilidi Nyatsumba,2021-01-29 *Successfully Implementing Turnaround Strategies in State-Owned Companies* is based on comprehensive research into the implementation of turnaround strategies at South African Airways and Kenya Airways, and into the strategic restructuring which saw Ethiopian Airlines emerging as the most successful African airline. It is based on almost 50 interviews which the author, turnaround strategy scholar Kaizer Nyatsumba, had with a wide variety of stakeholders especially in South Africa and Kenya, among them Senior Executives, Board Members, Cabinet Ministers (among them Barbara Hogan, Malusi Gigaba and Nhlanhla Nene) and Labour Representatives. Informed by in-depth research, this book is a must-read for anybody interested in the subject of turnaround strategies and, especially, how the fortunes of ailing State-owned companies in South Africa, Kenya and elsewhere on the continent can be turned around successfully.

*Lead Markets for Environmental Innovations* Klaus Jacob,Marian Beise,Jürgen M. Blazejczak,Dietmar Edler,Rüdiger Haum,Martin Jänicke,Thomas Löw,Ulrich Petschow,Klaus Rennings,2006-03-30 Why does one country take the lead over

others in the development and introduction of environmental innovations? This book analyzes lead markets for innovations such as fuel cells and photovoltaics, and offers insight into why this is. The authors use case studies to illustrate the policy framework that favors environmental innovation, and offer recommendations for research and development, environmental and industrial policies.

**Workplace Law** John Grogan,2014 This book deals with labour relations act, basic conditions of employment and employment equity acts, affirmative action, discrimination in employment, strikes and lock-outs, collective bargaining and many other issues.

Working Towards Sustainable Development International Labour Office,2012 A green economy is necessary if sustainable development is to be realised. However, as this report emphasizes, a green economy can also, if accompanied by the right policy mix, create more and better jobs, lift people out of poverty and promote social inclusion. In fact, the growth model of the past few decades has been inefficient, not only economically, but also from environmental, employment and social perspectives. It overuses natural resources, is environmentally unsustainable and has failed to meet the aspirations of a large proportion of society seeking productive, decent work and dignified lives. A new development model - one which puts people, fairness and the planet at the core of policy-making - is urgently needed, and is eminently achievable. More fundamentally, this report demonstrates that employment and social inclusion must be integral parts of any sustainable development strategy and must be included in policies that address climate change and ensure the preservation of the environment. In particular, the report assesses the sectoral, employment and income implications of the transition to a green economy. It highlights the necessary conditions, policy prescriptions and good practices required to ensure that the green economy is characterized by gains in job quality, reductions in poverty and improvements in social inclusion.

Labour Relations Sonia Bendix,2019 Labour Relations: A southern African perspective is the seventh edition of a text first published in 1989 under the title Labour Relations in South Africa. At that time, it was the first comprehensive textbook of its kind and was hailed as having reached the finishing line when others were still at the starting block. Since then continuous social, political and legislative developments, and the ever-changing labour relations scenario, have necessitated regular updates, as well as the more recent change to its title. Like its predecessors, this edition uses the labour 'relationship' as its starting point, guiding readers through the establishment of labour relations systems, the key participants and interactions involved and the legislation governing these interactions. It does this by using detailed practical examples, explanations and real-life cases where applicable. In various parts of this latest edition, the text touches on the Fourth Industrial Revolution,

the nature of changes to come and the implications for the world of work.--Publisher's description.

**Poor Workers' Unions** Vanessa Tait, 2005 'A critical contribution to broadening our understanding of who and what is the labor movement in the USA'. Tait captures the dynamism of alternative forms of working class organization that have long been ignored. Bill Fletcher, Jr., President, TransAfrica Forum and former assistant to AFL-CIO President John Sweeney. **Poor Workers' Unions** explores the ongoing shift in labor activism from the shop floor to the community. Focusing on the activism of minorities, immigrants, women, and the otherwise disenfranchised workers who have long been pushed to the sidelines in labor unions, Tait advances the idea that workers are not only the employed and largely skilled laborers previously organized in unions, but also the unemployed, those in low-wage work, and those who have been forced to work for less than minimum wage through the workfare programs in every state. An insider to labor organizing and participant in the infamous Pacifica Radio labor battles, Tait argues that labor organizing doesn't have to stay stuck in the dead-end legalistic and bureaucratic methods traditional unions have commonly relied on. Workers can, she proclaims, build the labor movement from below, utilizing inclusive social movement principles. In practice, that means organizing not just on the shop floor, but also around a broad range of issues, many of which are community-based, such as progressive welfare and wage policies, equal employment, and affirmative action, job creation, health and housing, and even global economic justice.

**Trade Unions and Their Members** Great Britain. Dept. of Employment, 1987 Presents proposals to modify labour relations law in the UK to increase the rights of trade union members.
