Educational Entrepreneurship Nicholas D. Young, Peter Bittel, 2015-04-14 School superintendents, business managers, central office leaders, elected officials, industry leaders, educators, and aspiring practitioners in the field of education will find this book a useful resource in understanding innovative ways to stretch limited school resources or to improve the scope and quality of services and programs offered to deserving students. Approaching educational entrepreneurship by leveraging public and private partnerships is the primary focus throughout the book. Where available, real-world examples from school districts across the country are presented to provide the reader with ideas to consider and potentially emulate. Appreciating that there are innumerable ways for school leadership to pursue entrepreneurialism, chapters that represent a wide cross-section of common areas of educational practice were selected for inclusion. It should not be surprising, then, that such topics as curriculum development, educational technology, cooperative purchasing, higher education relationships, grant writing, foundation planning, and special education service delivery were all examined as potential public-private partnership opportunities. Improving schools in the twenty-first century will require new ways of approaching age-old challenges, not the least of which centers on increasingly scarce public funding. In response, the authors invite all readers to join the quest of applying the principles of entrepreneurship to schools to make them even stronger for the next generation.

Back in the olden days before the internet was really popular and you could Google search anything, there was trial and error. If you wanted to start a house cleaning business from scratch you could, but it was rarely an overnight success for anybody. Big success was tossed to the cleaning service franchisees who could afford the fancy training, and well-built brands, while the mom and pop cleaning services were left to figure it out on their own. Good news - times have changed. As an independent house cleaner, you no longer have to wade through endless Pinterest boards for tips and ideas on how to start a house cleaning business. Angela Brown built from scratch one of the most successful independently owned and operated house cleaning companies in the Southeastern United States. If you're here because you have an interest in house cleaning or in upgrading your life and you want to start a house cleaning business, welcome. House cleaning business is a 49 billion dollar a year industry that is nearly recession proof - when times get hard, people work more hours to pay the bills, they have less time at home to clean, so they outsource their cleaning - which means more business for you and me.
