Beyond the picturesque Steven Jacobs, Frank Maes, 2009 Summary: De tentoonstelling in het S.M.A.K. en de daarmee gepaard gaande publicatie onderzoeken hoe het concept van het pittoreske nog altijd (of opnieuw) van toepassing kan zijn voor artistieke interpretaties van het huidige landschap. Ten eerste is het opvallend dat veel kunstenaars gefascineerd zijn door het hybride hedendaagse landschap waarin de verschillen tussen centrum en periferie, tussen stad en platteland en tussen natuur en cultuur niet langer duidelijk gedefinieerd zijn. Volgens de Italiaanse stedenbouwkundige Mirko Zardini laat

alleen de sensibele voor het pittoreske ons toe om dit territorium met nieuwe ogen te observeren: om de verschillen, de contrasten, de mengelingen en de nuances te begrijpen en te waarderen. Ten tweede is het hedendaagse natuurlijke landschap in grote mate en op globale schaal gekoloniseerd en gedomesticeerd met behulp van een wereldwijde verspreiding van beelden in de vorm van kunstwerken en allerhande mediale landschapsbeelden in film, televisie, toerisme, enzovoort.

Coaching with the Brain in Mind David Rock, Linda J. Page, 2009-08-06 DISCOVER THE SCIENCE BEHIND BRAIN-BASED COACHING By understanding how the brain works, coaching professionals can better tailor their language, strategies, and goals to be in alignment with an individual's "hard-wired" way of thinking. Written by two well-known coaching professionals, David Rock and Linda Page, *Coaching with the Brain in Mind* presents the tools and methodologies that can be employed by novice and experienced coaches alike to create an effective—and ultimately more rewarding—relationship for both coach and client. This informative guide to the neuroscience of coaching clearly demonstrates how brain-based coaching works in practice, and how the power of the mind can be harnessed to help an individual learn and grow. Illustrated with numerous case examples and stories, this book is organized for immediate use by professionals in their client work. Coverage includes: A succinct but comprehensive overview of the major scientific and theoretical foundations for coaching and their implications for practice How the language of coaching—setting goals, making connections, becoming more aware, seeking breakthroughs, and taking action—parallels what neuroscientists tell us about how the brain operates Neuroscience as a natural platform for the ongoing development of coaching Building on the existing foundation of coaching by adding neuroscience as an evidence base for the profession, *Coaching with the Brain in Mind* shows that it is possible to become a better professional coach by understanding how the brain works. As well, the authors, through their research, present that an understanding of neuroscience research, however new and speculative, can help coaches and leaders fulfill their potential as change agents in the lives of others.

A Practical Guide to Assessing English Language Learners Christine Anne Coombe, Keith S. Folse, Nancy J. Hubley, 2007
For many teachers of English language learners, the field of assessment is foreign territory. Assessment has its own culture, traditions, and terminology. This training guide is intended to help classroom teachers become more comfortable creating and using assessments. *A Practical Guide to Assessing English Language Learners* provides helpful insights into the practice and terminology of assessment. The text focuses on providing the cornerstones of good assessments—usefulness, validity, reliability, practicality, washback, authenticity, transparency, and security—and techniques for testing. It devotes a chapter to the assessment of each of the four main skill areas (reading, writing, listening, and speaking), and also covers placement testing, such as using TOEFL® and MELAB, diagnostic testing, evaluation, and instructional decision-making with regard to testing. Tips to improve students' test-taking strategies are offered, and each chapter ends with a helpful list of Ten Things to Remember, as well as informative case studies featuring two teachers and their assessment decisions. Incorporating its own principles, *A Practical Guide to Assessing English Language Learners* opens with a short quiz for the reader called Are You Testwise? that quickly determines how each teacher will benefit from this indispensable guide.

Cell Signalling John Hancock, 2010-01-21 Signalling within and between cells is an essential part of many biological processes, from the development of the body to the activity of our immune system. Cell Signalling, Third Edition, presents a carefully structured introduction to this intricate subject, introducing those conserved features that underlie many different extra- and intracellular signalling systems. Starting with an overview of cell signalling and highlighting its importance in many biological systems, the book goes on to explore the key components of extracellular and intracellular signalling mechanisms before examining how these components come together to create signalling pathways, which are so crucial to the survival of many living organisms. The text is enhanced by two-color artwork and 3-D protein models. A Companion Website provides resources for students and instructors.

All the Anxious Girls On Earth Zsuzsi Gartner, 2012-04-10 At the heart of Zsuzsi Gartner's exuberant prose is a cri de coeur for personal responsibility as the sun sets on a century in which the media was omnipresent and everyone felt like a victim. There are no innocent bystanders here, though. A woman calls in fake bomb threats from the nineteenth floor of a bank tower as revenge against her ex-lover. The mother of a girl killed by a teenage urban guerrilla thrives spectacularly in her industrious grief, transforming herself into a forgiveness guru and talk-show host. Lured into the wilderness by her desire for a man who rebuilds vintage airplanes, a young woman finds she lusts more for biscotti and city sidewalks. A small, heroic child makes a guileless request for pajamas and creates a psychic storm at the centre of her anxious, achievement-mad, parents' lives. These are deliciously noisy stories-high-octane, linguistic rocketry that takes on a world gone numb. Often both achingly poignant and funny, these remarkable tales dazzle with a unique sensibility shot through with intellectual verve and crackling black wit.

Carnival: A Novel Rawi Hage, 2013-06-17 A stirring new masterpiece from the IMPAC Dublin Literary Award-winning author of Cockroach and De Niro's Game. In Carnival, internationally acclaimed author Rawi Hage takes us into the world of Fly, a taxi driver in a crime-ridden apocalyptic metropolis. Raised in the circus, the son of a golden-haired trapeze artist and

a flying-carpet man, Fly sees everything, taking in all of the city's carnivalesque beauty and ugliness as he roves through its dizzying streets in his taxi. Fly is a reader, too, and when he's not in his taxi he is at home in the equally dizzying labyrinth of books that fills his tiny apartment. His best friend is Otto, a political activist who's in and out of jails and asylums, mourning his dead wife and lost foster son. On one otherwise tawdry night Fly meets Mary, a book-loving passenger with a domineering husband. So begins a romance that is, for Fly, a brief glimmer of light amid the shadows and grit of the Carnival city. Along with Otto and Mary, Fly introduces us to madmen and revolutionaries, magicians and prostitutes as he picks them up and drops them off, traveling through a nightmarish town that is—we can't help but notice—a parable for our own debauched, unjust world. Wildly imaginative and darkly ironic, *Carnival* is a magnificent achievement.

Bottle Rocket Hearts Zoe Whittall, 2007-04-14 Welcome to '90s Montreal. It's been five years since the OKA crisis and the sex garage riots; the queers are rioting against assimilation, cocktail AIDS drugs are starting to work, and the city walls on either side of the Main are spray-painted with the words YES or NO. Revolution seems possible to eighteen-year-old Eve, who is pining to get out of her parent's house in Dorval and find a girl who wants to kiss her back. She meets Della: ten years older, mysterious, defiantly non-monogamous, and an avid separatist. Their explosive beginning and volatile relationship paves a path for the personal and political to collide on the night of the referendum.
