Maintenance and Child Support in Private International Law Lara Walker,2015-02-19 No one would dispute that the duty to provide for those that you have a legal and moral obligation to support is very important. With the movement and migration of people both within Europe and globally, there are more and more families and relations who live in different States. Therefore it is imperative that suitable and workable methods exist to create maintenance obligations and then secure the transfer of funds, particularly from abroad. In the book the provisions in EU Maintenance Regulation no 4/2009 and the Hague Maintenance Convention of 2007 are analysed in order to discover what developments and therefore potential improvements have been made in relation to the recovery of maintenance from abroad. The book also includes an empirical study on the first year of operation of the Maintenance Regulation. Data collected has been analysed in order to supplement the critique of the instruments. The information and analysis is used to suggest suitable solutions for the future, which include amendments to the Regulation and recommendations for best practice.

Transforming the Workforce for Children Birth Through Age 8 National Research Council,Institute of Medicine,Board on Children, Youth, and Families,Committee on the Science of Children Birth to Age 8: Deepening and Broadening the Foundation for Success,2015-07-23 Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

Ethics, Conflict and Medical Treatment for Children E-Book Dominic Wilkinson, Julian Savulescu, 2018-08-05 What should happen when doctors and parents disagree about what would be best for a child? When should courts become involved? Should life support be stopped against parents' wishes? The case of Charlie Gard, reached global attention in 2017. It led to widespread debate about the ethics of disagreements between doctors and parents, about the place of the law in such disputes, and about the variation in approach between different parts of the world. In this book, medical ethicists Dominic Wilkinson and Julian Savulescu critically examine the ethical questions at the heart of disputes about medical treatment for children. They use the Gard case as a springboard to a wider discussion about the rights of parents, the harms of treatment, and the vital issue of limited resources. They discuss other prominent UK and international cases of disagreement and conflict. From opposite sides of the debate Wilkinson and Savulescu provocatively outline the strongest arguments in favour of and against treatment. They analyse some of the distinctive and challenging features of treatment disputes in the 21st century and argue that disagreement about controversial ethical questions is both inevitable and desirable. They outline a series of lessons from the Gard case and propose a radical new 'dissensus' framework for future cases of disagreement. - This new book critically examines the core ethical questions at the heart of disputes about medical treatment for children. - The contents review prominent cases of disagreement from the UK and internationally and analyse some of the distinctive and challenging features around treatment disputes in the 21st century. - The book proposes a radical new framework for future cases of disagreement around the care of gravely ill people.

Family Life, Family Law, and Family Justice Marsha Garrison,2022-10-28 Family Life, Family Law, and Family Justice: Tying the Knot combines history, social science, and legal analysis to chart the evolution and interdependence of family life and family law, portray current trends in family life, explain the pressing policy challenges these trends have produced, and analyze the changes in family law that are essential to meeting these challenges. The challenges are large and pressing. Across the industrialized West, nonmarital birth, relational stress, multi-partner fertility, and relationship dissolution have increased, producing a dramatic rise in single parenthood, poverty, and childhood risk. This concentration of familial and economic risk accelerates socioeconomic inequality and retards intergenerational mobility. Although the divide is most pronounced in the United States, the same patterns now affect families throughout the Western world. Across the European Union, there are 9.2 million lone parents, and just under half of their families live in poverty. Tying the Knot demonstrates how today's family patterns are deeply rooted in long-standing, class-based differences in family life and explains why these class-based differences have accelerated. It explains how the values that guide family law development inevitably reflect the world in which families live and develops a new family law capable of meeting the needs of twenty-first century families. The book will be of considerable interest to family specialists from a number of fields, including law, demography, economics, history, political science, public health, social policy, and sociology.

Principles and Practice in Second Language Acquisition Stephen D. Krashen,1982 The present volume examines the relationship between second language practice and what is known about the process of second language acquisition, summarising the current state of second language acquisition theory, drawing general conclusions about its application to methods and materials and describing what characteristics effective materials should have. The author concludes that a solution to language teaching lies not so much in expensive equipment, exotic new methods, or sophisticated language analysis, but rather in the full utilisation of the most important resources - native speakers of the language - in real communication.

Ask a Manager Alison Green,2018-05-01 'I'm a HUGE fan of Alison Green's Ask a Manager column. This book is even better' Robert Sutton, author of The No Asshole Rule and The Asshole Survival Guide 'Ask A Manager is the book I wish I'd

You'll learn what to say when: · colleagues push their work on you - then take credit for it · you accidentally trash-talk someone in an email and hit 'reply all' · you're being micromanaged - or not being managed at all · your boss seems unhappy with your work · you got too drunk at the Christmas party With sharp, sage advice and candid letters from real-life readers, *Ask a Manager* will help you successfully navigate the stormy seas of office life.

Children, Courts, and Custody Andrew I. Schepard, 2004-03-01 The level of conflict between parents is the key factor in how children overcome the challenges divorce creates. This book provides an overview of relevant trends in law, conflict resolution and mental health and the empirical research that supports them. It analyzes the principal challenges facing the child custody court of today which entails assuring the safety of parents and children from violence and providing access to justice and services. Concluding with an agenda for reform of the child custody court, the volume advocates interdisciplinary collaboration to help courts meet the needs of twenty-first century parents and children.
