Neuropsychological Evaluation of the Spanish Speaker Alfredo Ardila, Monica Rosselli, Antonio E. Puente, 2013-06-29 This book is the culmination of a research program conducted in Colombia during the past several years. The fundamental aim of the program was to develop neuropsychological tests for Spanish speakers, especially elderly individuals and those with limited educational attainment. The lack of norms for these populations represents a significant practical problem not only in developing countries but also in more developed countries. For example, norms are usually obtained with middle-class Anglo-Saxon English-speaking populations, often university students, and such norms do not usually include individuals older than 65 years. Furthermore, very few neuropsychological tests have been developed for Spanish speakers; frequently, tests are translated into Spanish (often poor translations at that), but the norms used are still those obtained from English speaking populations. This volume summarizes the normative results of this research program. We anticipate that these tests and norms will be particularly useful in the neuropsychological evaluation of Spanish speakers, especially those with limited educational attainment, and the elderly. The United States represents the fifth largest Spanish-speaking country in the world (after Mexico, Spain, Argentina, and Colombia), with over 20 million speakers. It is anticipated that by the year 2025 there will be as many Hispanics in the United States as members of all other ethnic minority groups combined. Further, about 10% of the U. S. population are considered functionally illiterate, with Hispanics representing an unusually large segment.

Evaluation of the FAO-EU forest law enforcement, governance and trade programme - Phase III Food and Agriculture Organization of the United Nations, 2022-04-11 The FAO-EU forest law enforcement, governance and trade (FLEGT) programme seeks to reduce and eventually eliminate illegal logging. With the support of its donors, the European Union, the Swedish International Development Cooperation Agency (SIDA) and the Foreign, Commonwealth and Development Office (FCDO), the FAO-EU FLEGT Programme funds projects created by governments, civil society and private sector organizations in Latin America, Africa and Asia to improve forest governance and promote trade in legal timber products on domestic and international markets. The Programme works in support of the European Commission's Action Plan on FLEGT to promote the legal production and consumption of timber. The evaluation looked at the third phase of the

programme, which remained a significant contribution to the goals of the FLEGT Action Plan. The increased capacity of service providers (particularly beginner non-governmental organizations and civil society organizations) and micro, small and medium-sized enterprise associations was considered the most significant change generated by the programme. The promotion of South-South cooperation proved to be an important aspect of capacity enhancement. Thanks to increased capacities, but also multi-stakeholder platforms and improved policy and regulative tools, a positive incipient impact on more inclusive forest governance has been achieved. More information and independent forest monitoring provided an important contribution to improved enabling conditions for legal timber trade and on the information of timber legality, even though the actual market impact is still limited. Recommendations to FAO and its project partners and stakeholders include actions to take away institutional, fiscal, technical and political barriers to scale up results, and actions to strengthen the sustainability of results, gender equity and social inclusion, knowledge management as well as monitoring and evaluation.

Evaluating Systems for Multilingual and Multimodal Information Access Thomas Deselaers,Nicola Ferro,Julio Gonzalo,Mikko Kurimo,Thomas Mandl,Vivien Petras,2009-09-29 The ninth campaign of the Cross-Language Evaluation Forum (CLEF) for European languages was held from January to September 2008. There were seven main evaluation tracks in CLEF 2008 plus two pilot tasks. The aim, as usual, was to test the performance of a wide range of multilingual information access (MLIA) systems or system components. This year, 100 groups, mainly but not only from academia, participated in the campaign. Most of the groups were from Europe but there was also a good contingent from North America and Asia plus a few participants from South America and Africa. Full details regarding the design of the tracks, the methodologies used for evaluation, and the results obtained by the participants can be found in the different sections of these proceedings. The results of the CLEF 2008 campaign were presented at a two-and-a-half day workshop held in Aarhus, Denmark, September 17-19, and attended by 150 researchers and system developers. The annual workshop, held in conjunction with the European Conference on Digital Libraries, plays an important role by providing the opportunity for all the groups that have participated in the evaluation campaign to get together comparing approaches and exchanging ideas. The schedule of the workshop was divided between plenary track overviews, and parallel, poster and breakout sessions presenting this year's experiments and discussing ideas for the future. There were several invited talks.

Evaluation of protoplast viability of Mirabilis jalapa and synthetic seed production Rath C.R,S. N. Suresh,S.

Geethalakshmi,M. Ilangovan,Niranjana V Das,Prem Jose Vazhacharickal, *Mirabilis jalapa* a perennial, herbaceous, bushy plant that reaches stature heights of mostly 1 meter, rarely up to 2 meters, in height. It may also be grown as an annual, especially in the temperate zone. The single-seeded fruits are spherical, wrinkled and black upon maturity, having started out greenish-yellow. The stems are thick, full, quadrangular with many ramifications and rooting at the nodes. The posture is often prostrate. A curious aspect of *M. jalapa* is that flowers with different colors grow simultaneously on the same plant. Additionally, an individual flower can be splashed with different colors. Flower patterns are referred to as sectors (whole sections of flower), flakes (stripes of varying length), and spots. A single flower can be plain yellow, red, magenta, pink, or white, or have a combination of sectors, flakes, and spots. Furthermore, different combinations of flowers and patterns can occur on. Artificial seeds are the living seed-like structure which are made experimentally by a technique where somatic embryoids derived from plant tissue culture are encapsulated by a hydrogel and such encapsulated embryoids behave like true seeds if grown in soil and can be used as a substitute of natural seeds. different flowers of the same plant. The viability of the artificial seeds depend on several factors related to conditions of storing the seeds and parts of the flower from which the explant is obtained. The protoplast is prepared from several parts like flower, leaf, stem, root, buds and meristem. These explants are grown in different concentrations of sucrose like 5%, 10%, 15%, 20%, 25%, 30%, 35%, 40%, 45%, 50%. The production of synthetic seeds are also studied in this experiment.

Household Risk Management and Social Protection in Chile ,2005 This publication examines whether a social protection system (broadly defined to include policy interventions, public institutions, and the regulation of private institutions to address welfare costs of problems such as job loss and extended unemployment, health episodes, old age, and life-time poverty) exists in Chile or whether it is has a set of loosely co-ordinated programmes instead. It assesses whether households are provided with appropriate tools to mitigate risks to their income, identifies gaps in coverage, and sets out guidelines, grounded in a conceptual framework, designed to increase the effectiveness of social protection.

Bolivia Vicente Fretes Cibils,Marcelo Giugale,Connie Luff,2006 Bolivia's challenges with regard to policy are multiple, deep and multifaceted, and as such they require integral proposals. The book tries to cover these challenges in their different dimensions and presents options to grow more and better - creating jobs, with benefits for all, and without corruption and with civic participation. The design and implementation of all these options, simultaneously or in the short- and medium-term, is not feasible; and from here blooms options.

Chile's High Growth Economy ,2002-01-01 Chile has benefited from strong growth and well targeted social programs

over recent years that have resulted in a reduction of poverty at all income levels. In analyzing the progress in poverty reduction made in Chile, the different dimensions of poverty, including income and access to social services are reviewed. This World Bank report updates information on development in Chile through a focus on the years 1994 - 1998. It has developed and applied a methodology for the estimate of the imputed income transfers from government subsidies in health, education, and housing for the years 1990, 1994, 1996, and 1998. Access to social services, demonstrated by reduced infant mortality, increased life expectancy, and housing availability, have shown significant improvements in the evaluation period. Despite this achievement, income inequality remains relatively high and unemployment, among younger and poorer workers, is a severe problem.

Measurement and Meaning Estanislao Gacitúa-Marió, Quentin Wodon, 2001-01-01 This year's Global Economic Prospects argues for reshaping the global architecture of world trade to promote development and poverty reduction. The report focuses on four policy areas: -Using the WTO ministerial to launch a development round of trade negotiations that would reduce global trade barriers. -Engaging in global collective action to promote trade outside the negotiating framework of the WTO. -Adopting pro-trade development policies of high-income countries unilaterally. -Enacting new trade reform in developing countries. The report contends that the policies recommended in these four areas would reshape the global trade architecture in a way that would enhance the prospects of developing countries and reduce world poverty. While the most likely scenario is for recovery beginning in 2002, today's slow growth of global trade and weakening financial flows to all but the most creditworthy countries, has impeded growth in developing countries. Global Economic Prospects 2002 concludes that the long-term promise of well-implemented trade reform is therefore tangible: a world with a much higher standard of living, hundreds of millions lifted out of poverty, and a sharp increase in children living beyond their fifth birthday to become productive citizens of the world.

Matching Contributions for Pensions Richard Hinz, Robert Holzmann, David Tuesta, Noriyuki Takayama, 2012-10-25 The use of matching contributions to enhance the participation and level of savings in pensions system has now been in use for nearly three decades in a number of high income countries. Increasingly, countries across the full range of economic development are looking to the design as a means of addressing the low rates of participation in formal pension and other retirement savings systems. A number of countries have recently introduced innovations in their pension systems that significantly rely on contributions matches and related types of direct subsidies to provide incentives for groups that

mandates and other indirect methods such as preferential tax treatment have been unsuccessful in reaching. There is particular interest among developing countries in utilizing this design to extend coverage to informal sector and low income workers that typically do not pay income related taxes. This volume provides descriptions and analysis of the design, experience and outcomes achieved in the high income countries where there information about the dynamics and outcomes that this approach has achieved is not beginning to emerge. It also reviews new efforts to use the design in a number of other settings in which the matching contributions have been included as a significant element in reform of the pension system. The review of the experience with matching contribution across this full range of settings provides important observations and some initial lessons for policy makers and analysts who may be considering or evaluating the use of this approach to increase pension coverage.
